*Kenyan English* Alfred Buregeya, 2019-08-05 English in Kenya is a stable post colonial variety that is used as an inter ethnic lingua franca in private domains is the medium of instruction as well as the language spoken in parliament and court rooms Yet so far no comprehensive research monograph on Kenyan English has been published that surveys its characteristic linguistic features The present book closes this gap by giving a full description of the characteristic linguistic features of Kenyan English The book provides an in depth overview of Kenyan English phonetics phonology morphology syntax semantics and pragmatics and also gives a meticulous account of the diachronic evolution of this post colonial variety

Higher Education and Capacity Building in Africa Hanne Kirstine Adriansen, Lene Møller Madsen, Stig Jensen, 2015-11-06 Higher education has recently been recognized as a key driver for societal growth in the Global South and capacity building of African universities is now widely included in donor policies The question is how do capacity building projects affect African universities researchers and students Universities and their scientific knowledges are often seen to have universal qualities therefore capacity building may appear straight forward Higher Education and Capacity Building in Africa contests such universalistic notions Inspired by ideas about the geography of scientific knowledge it explores what role specific places and relationships have in knowledge production and analyses how cultural experiences are included and excluded in teaching and research Thus the different chapters show how what constitutes legitimate scientific knowledge is negotiated and contested In doing so the chapters draw on discussions about the hegemony of Western thought in education and knowledge production The authors own experiences with higher education capacity building and knowledge production are discussed and used to contribute to the reflexive turn and rise of auto ethnography This book is a valuable resource for researchers and postgraduate students in education development studies African studies and human geography as well as anthropology and history

**Critical Pedagogy** Tomas Boronski, 2021-08-16 This accessible text provides a clear overview of the contemporary themes and challenges within critical pedagogy and suggests a path towards a more conscientious world for all through education Boronski encourages us to imagine radical alternatives to current approaches not merely for ideological reasons but due to increasing necessity for environmental and sociological perspectives With case studies discussion tasks and exemplars from global history woven throughout each chapter considers a prominent societal and educational issue tackling some difficult and unsettling areas Embedded in this exploration is an understanding and application of key concepts such as justice equality rights and power and how these relate to a range of topics in UK schooling These include the role of teachers in an age of hyper surveillance and performance monitoring alternative approaches to education and the growing fear of the other Essential reading for Education Studies students at

undergraduate and Master s level this comprehensive text will also be of interest to students of Social Policy Sociology and Politics programmes

**Antarcticness** Ilan Kelman, 2022-02-08 Antarcticness joins disciplines communication approaches and ideas to explore meanings and depictions of Antarctica Personal and professional words in poetry and prose plus images present and represent Antarctica as presumed and as imagined alongside what is experienced around the continent and by those watching from afar These understandings explain how the Antarctic is viewed and managed while identifying aspects which should be more prominent in policy and practice The authors and artists place Antarctica and the perceptions and knowledge through Antarcticness within inspirations and imaginations without losing sight of the multiple interests pushing the continent s governance as it goes through rapid political and environmental changes Given the diversity and disparity of the influences and changes the book s contributions connect to provide a more coherent and encompassing perspective of how society views Antarctica scientifically and artistically and what the continent provides and could provide politically culturally and environmentally Offering original research art and interpretations of different experiences and explorations of Antarctica explanations meld with narratives while academic analyses overlap with first hand experiences of what Antarctica does and does not could and could not bring to the world

**Spectral Geometry of Graphs** Pavel Kurasov, 2023-11-07 This open access book gives a systematic introduction into the spectral theory of differential operators on metric graphs Main focus is on the fundamental relations between the spectrum and the geometry of the underlying graph The book has two central themes the trace formula and inverse problems The trace formula is relating the spectrum to the set of periodic orbits and is comparable to the celebrated Selberg and Chazarain Duistermaat Guillemin Melrose trace formulas Unexpectedly this formula allows one to construct non trivial crystalline measures and Fourier quasicrystals solving one of the long standing problems in Fourier analysis The remarkable story of this mathematical odyssey is presented in the first part of the book To solve the inverse problem for Schr dinger operators on metric graphs the magnetic boundary control method is introduced Spectral data depending on the magnetic flux allow one to solve the inverse problem in full generality this means to reconstruct not only the potential on a given graph but also the underlying graph itself and the vertex conditions The book provides an excellent example of recent studies where the interplay between different fields like operator theory algebraic geometry and number theory leads to unexpected and sound mathematical results The book is thought as a graduate course book where every chapter is suitable for a separate lecture and includes problems for home studies Numerous illuminating examples make it easier to understand new concepts and develop the necessary intuition for further studies

**Intersectionality and Women's Access to Justice in Africa** J. Jarpa Dawuni, 2022-10-17 Intersectionality and Women s Access to Justice edited by J Jarpa Dawuni propounds layered intersectionality as a paradigm for examining how gendered factors affect women s access to justice whether as judges or litigants Through intersectional and decolonial frameworks the contributors analyze the lived experiences of women and their access to justice by situating the courtroom as both a spatial

and a temporal arena for seeking justice as litigants and for seeking access to the bench as judges This book examines patterns of mutually reinforcing discriminatory practices that women share based on common gender identities and depending on which identities are at play at a given point in time in both traditional and statutory courts The book provides recommendations for various justice sector providers [Caribbean Journal of Education](#) ,1989 **Helping Scientists to Communicate Well for All Considered: Strategic Science Communication in an Age of Environmental and Health Crises** Scott McWilliams,Marcia Allison,Marina Joubert,Ingrid Lofgren,Brianne Suldovsky,2022-09-16 **Development of Higher Education in Africa** Alexander W.
