## 15 2016 Egerton Intake:

**Thus Until** Emilia Ilieva, Reuben Matheka, 2025-08-04 **Thus Until** A History of Egerton University is a thorough historical chronological and well researched account of Egerton University from a whites only college when it started in 1939 through to the expansion it has experienced over the years culminating in being a full university More than any other university in Kenya Egerton has a long and colourful history but like all the other universities it has suffered from the political economic and financial challenges of the time especially since the double intake of the 1990s Chapter One provides the required background to the study highlighting agricultural and educational policies and steering away from the Happy Valley hype so characteristic of the period The reader will learn about the Egerton family in Chapter Two and particularly about Lord Egerton himself and the colonial circumstances within which he lived The chapter dispels some of the popularly held myths about him Chapter Three deals with the beginnings of the college and the various structural and curriculum experiments tried out and the kind of enrolment and students it experimented with as an all white establishment The chapter ends with Africans beginning to agitate for change With great attention to detail the later chapters put the university in a broader local and international context thereby increasing its relevance to society A History of Egerton University though heavily footnoted and with a detailed bibliography is written in a simple easy flowing and accessible style

**Anthrozoology** Michael Charles Tobias, Jane Gray Morrison, 2016-12-20 This groundbreaking work of both theoretical and experiential thought by two leading ecological philosophers and animal liberation scientists ventures into a new frontier of applied ethical anthrozoological studies Through lean and elegant text readers will learn that human interconnections with other species and ecosystems are severely endangered precisely because we lack by our evolutionary self confidence the very coherence that is everywhere around us abundantly demonstrated What our species has deemed to be superior is according to Tobias and Morrison the cumulative result of a tragically tenuous argument predicated on the brink of our species self destruction giving rise to a most unique proposition We either recognize the miracle of other sentient intelligence sophistication and genius or risk enshrining the shortest lived epitaph of any known vertebrate in earth s 4 1 billion years of life Tobias and Morrison draw on 45 years of research in fields ranging from ecological anthropology animal protection and comparative ethics to literature and spirituality and beyond They deploy research in animal and plant behavior biocultural heritage contexts from every continent and they bring to bear a deeply metaphysical array of perspectives that set this book apart from any other The book departs from most work in such fields as animal rights ecological aesthetics comparative ethology or traditional animal and plant behaviorist work and yet it speaks to readers with an interest in those fields A deeply provocative book of philosophical premises and hypotheses from two of the world s most influential ecological philosophers this text is likely to stir uneasiness and debate for many decades to come
