

If we act together, on these principles, as public representatives, civil servants, business people, youth, workers and citizens, we can overcome the challenges of tough economic times and difficult adjustments.

In acting together we can address declining confidence and the retreat of capital, and we can combat emerging patterns of predatory behaviour and corruption.

We are conscious of the difficulties we face. Our resilience as a nation, black and white, can propel us to a better future if we make the right choices.

Honourable Speaker, I hereby table before the House:

- The 2016 Budget Speech,
- The 2016 Budget Review, including
 - The fiscal framework,
 - The revenue proposals, customs and excise duties and estimates of national revenue, and
 - Our responses to the Budgetary Review and Recommendation Reports,
- The Division of Revenue Bill,
- The Appropriation Bill, and
- The Estimates of National Expenditure.

In addition, I am introducing the Revenue Laws Amendment Bill 2016 to adjust certain provisions regarding to retirement funds, and related matters.

These are our budget proposals, and I look forward to further engagement through the Parliamentary budget process.

Global Competition or Convergence? Jan Hornát, Lukáš Kindl, 2018-02-01 The dynamics of internal changes in China whether these changes impact its national economy or its political order and distribution of power have imminent influence on its relations with the rest of the world The important and perhaps less treated question vis vis China's rise is how and to what extent do internal changes in China affect its external behavior and thus its relations with the current world hegemon the United States In addition this publication asks what the clash of two politically culturally and economically different internal orders of the US and China will mean for their future interactions in the twenty first century The aim of this publication is not to measure and encompass the entirety of the posed question but rather to provide an incursion into this problem through two specific case studies one focusing on the interactions of two distinct political cultures and the other on the economic geopolitical and ideological interplay of the US and China on the African continent As will be demonstrated incompatible as the two regimes and their respective foreign policies may seem they will not necessarily predestine conflicts in mutual relations As America can well coexist with China even if it does not meet the Western standards of a liberal democracy so does the competition in Africa between these two major powers not have to amount to a zero sum game At the end of the day both countries might meet halfway in their respective political interactions

Hong Kong in the Shadow of China Richard C. Bush, 2016-10-11 A close up look at the struggle for democracy in Hong Kong Hong Kong in the Shadow of China is a reflection on the recent political turmoil in Hong Kong during which the Chinese government insisted on gradual movement toward electoral democracy and hundreds of thousands of protesters occupied major thoroughfares to push for full democracy now Fueling this struggle is deep public resentment over growing inequality and how the political system established by China and dominated by the local business community reinforces the divide between those who have profited immensely and those who struggle for basics such as housing Richard Bush director of the Brookings Institution's Center on East Asia Policy Studies

takes us inside the demonstrations and the demands of the demonstrators and then pulls back to critically explore what Hong Kong and China must do to ensure both economic competitiveness and good governance and the implications of Hong Kong developments for United States policy **The Report: Trinidad & Tobago 2016** Oxford Business Group,2016-08-07 In its March 2016 Economic Bulletin the Central Bank of T T stated that after negative growth of 1% in 2014 T T s economy contracted by a further 2.1% in 2015 as per provisional data Meanwhile government revenue fell by 6.2% in FY 2014/15 with a 35% decline in energy collections outstripping increases in non energy and capital receipts Nonetheless the recessionary environment is not without opportunity for the country s new leadership As the Government of Keith Rowley which assumed office in September 2015 works to bring government spending under control policies aimed at economic diversification could be set to gain further traction Moreover given that T T has a safety buffer in the form of strong foreign currency reserves and a sovereign wealth fund there is a relatively room to manoeuvre **Taxing Soda for Public Health** Yann Le

The Political Economy of Mental Illness in South Africa

André J van Rensburg,2021-02-17 The book describes key socio political reforms that helped shape post apartheid South Africa s mental health system The author interrogates how reforms shaped public community based services for people living with severe mental illness and how features of this care has been determined in part at least by the relations between actors and structures in the state private for profit health care and civil society spheres A description of the development of South Africa s post apartheid health system and the contentions that emerge therein sets the stage for an analysis of the country s most tragic human rights failure during its democratic period namely the Life Esidimeni tragedy The roots of the tragedy are not only framed as a loss of life and dignity as a result of political corruption and administrative mismanagement but as a power differential that ultimately highlights an unjust system that relegates its most vulnerable citizens to commodities without voice and without agency The book concludes that the commodification of severe mental illness has been a product of neoliberal discourses that have shaped the economic ways in which the post apartheid South African state have governed poverty and severe mental illness This book will be of interest to scholars of health social and economic policy in South Africa

Sustainable Urbanization in India Jenia Mukherjee, 2017-10-06 This comprehensive volume contributes to the existing and emerging body of literature on contemporary urbanization and the interactions between cities and the environment. The volume is contextualized against latest theories, debates and discussions on sustainable urbanization, the post 2015 development agenda of the United Nations and India's official launching of the smart city agenda. Reflecting on three major components of urban sustainability: investments and infrastructures, waste management and urban ecologies and environmentalisms, it moves beyond the bi-centric approach of only looking into the differences between the developed and the developing world and reflects on cities across India using polycentric methods and approaches. The Indian urban scenario is extremely complex and diverse and solutions laid out in official and non-official documents tend to miss these complexities. This volume includes innovative research across different parts of India, identifying city-specific sources of unsustainability and challenges along with strategies and potentials that would make the process of urban transition both sustainable and equitable. Complex explorations of non-linear, bottom-up, multisectoral process-based local urban contexts across north, south, east and west Indian cities in this volume critique a general acceptance of the universalized concept of sustainable urbanization and suggest ways that might be important for transcending inclusive theories to form practical policy-based recommendations and actions.

Kingdom of Lesotho International Monetary Fund, African Dept., 2016-02-03 The 2015 Article IV Consultation discusses key issues related to the economic growth of Lesotho. Although Lesotho achieved solid economic growth with only moderate inflation in the several years, this growth has failed to reduce poverty in the country. Lesotho's major chunk of revenue comes from the South African Customs Union to finance large government expenditures, but this revenue will fall sharply in fiscal year 2016/17. Despite having substantial international reserves and fiscal buffers, a major fiscal adjustment over the next two to three years will be needed to maintain macroeconomic stability. The private sector needs to be the engine for job creation to strengthen inclusiveness.

Changing Fortunes Paul Tilley, 2019-08-06 Treasury has been at the centre of every major economic policy issue the Australian Government has faced

its role evolving from the government's bookkeeper at Federation in 1901 to the economic policy advising agency it is today. Throughout its history Treasury has been a robust and stable institution with a consistent market-oriented economic framework but its policy influence has waxed and waned. It has supported reformist Treasurers such as Keating and Costello and been a voice of caution when political imperatives have pushed governments down economically damaging paths. At times though Treasury advice has been ignored and it has been pushed out into the cold. Amidst the political chaos of recent times Treasury has been dragged closer to government and become a less effective policy adviser. The consequent lack of a consistent government economic reform narrative over the last decade is plain for all to see. Changing Fortunes tracks Treasury's history since Federation with a focus on the modern era since its 1976 split with Finance. **India Transformed** Rakesh Mohan, 2018-09-25. In this commemorative volume India's top business leaders and economic luminaries come together to provide a balanced picture of the consequences of the country's economic reforms which were initiated in 1991. What were the reforms? What were they intended for? How have they affected the overall functioning of the economy? With contributions from Mukesh Ambani, Narayana Murthy, Sunil Mittal, Kiran Mazumdar, Shaw, Shivshankar Menon, Montek Singh Ahluwalia, T. N. Ninan, Sanjaya Baru, Naushad Forbes, Omkar Goswami, and R. Gopalakrishnan, *India Transformed* delves deep into the life of an economically liberalized India through the eyes of the people who helped transform it.
