Cupers, Helena Mattsson, Catharina Gabrielsson, 2020-02-25 Architecture and urbanism have contributed to one of the most sweeping transformations of our times. Over the past four decades neoliberalism has been not only a dominant paradigm in politics but a process of bricks and mortar in everyday life. Rather than to ask what a neoliberal architecture looks like or how architecture represents neoliberalism this volume examines the multivalent role of architecture and urbanism in geographically variable yet interconnected processes of neoliberal transformation across scales from China Turkey South Africa Argentina Mexico the United States Britain Sweden and Czechoslovakia. Analyzing how buildings and urban projects in

different regions since the 1960s have served in the implementation of concrete policies such as privatization fiscal reform deregulation state restructuring and the expansion of free trade contributors reveal neoliberalism as a process marked by historical contingency Neoliberalism on the Ground fundamentally reframes accepted narratives of both neoliberalism and postmodernism by demonstrating how architecture has articulated changing relationships between state society and economy since the 1960s *Free Will and Consciousness in the Multiverse* Christian D. Schade,2019-01-29 It is hard to interpret quantum mechanics The most surprising but also most parsimonious interpretation is the many worlds or quantum multiverse interpretation implying a permanent coexistence of parallel realities Could this perhaps be the appropriate interpretation of quantum mechanics This book collects evidence for this interpretation both from physics and from other fields and proposes a subjectivist version of it the clustered minds multiverse The author explores its implications through the lens of decision making and derives consequences for free will and consciousness For example free will can be implemented in the form of vectorial choices as introduced in the book He furthermore derives consequences for research in the social sciences especially in psychology and economics *The Monetary System* Jean-François Serval,Jean-Pascal Tranié,2014-12-15 A groundbreaking work that paves the way for a new pro active financial system With *The Monetary System* innovative author pairing Jean Francois Serval and Jean Pascal Tranie devise a comprehensive economic modeling system that accounts for the unprecedented situation facing international and regional economies by developing a controversial new stance on the operation of money in society Presenting a classification of financial instruments with a view toward their underlying legal structures the book sheds new light on the present economic and financial problems of slow growth and rising debts and proposes possible outcomes for the global economy The authors have already gained international attention with their novel approach to currency and now they turn their attention to the social function of money in all its myriad forms The book provides a way forward in an era of increased life expectancy and other new social patterns and the social role of money provides a framework for understanding intergenerational redistribution an urgently pressing task in our time New aggregate financial categories and economic modeling reveal a possible foundation for increased financial stability Companion website includes key mathematical models accounting standards and PowerPoint slides Comprehensive theoretical underpinning presents the contemporary model of money as a social contract Insights into the current economic situation make sense of sovereign debt risk in markets around the world With questions and answers at the end of each chapter *The Monetary System* will help you form a new conception of the role of money in society Improved regulation and tax policies are needed to stabilize the global economy and this book provides the framework for getting there
