**Sustainable Waste Management Challenges in Developing Countries** Pariatamby, Agamuthu, Shahul Hamid, Fauziah, Bhatti, Mehran Sanam, 2019-10-18 As global waste generation increases at a rapid rate there is a dire need for waste management practices such as collection disposal and recycling to protect from environmental pollution. However, developing countries generate two to three times more waste, resort to open dumps more often than developed countries, and are slower to integrate waste management standards. There is a need for studies that examine the waste generation and practices of countries that share similar economic backgrounds as they strive to implement successful waste management techniques. *Sustainable Waste Management Challenges in Developing Countries* is an essential reference source that discusses the challenges and strategies of waste management practices and the unique waste issues faced by developing countries that prevent them from achieving the goal of integrated waste management. While highlighting topics including e-waste transboundary movement and consumption patterns, this book is ideally designed for policymakers, legislators, waste company managers, environmentalists, students, academicians, and municipal planners seeking current research on the global waste management problem.

**The Plant Family Fabaceae** Mirza Hasanuzzaman, Susana Araújo, Sarvajeet Singh Gill, 2020-07-01 This book comprehensively introduces all aspects of the physiology, stress responses, and tolerance to abiotic stresses of the Fabaceae plants. Different plant families have been providing food, fodder, fuel, medicine, and other basic needs for the human and animal since ancient times. Among the plant families, Fabaceae have special importance for their agricultural importance and multifarious uses apart from the basic needs. Interest in the response of Fabaceae plants toward abiotic stresses is growing, considering the economic importance and the special adaptive mechanisms. Recent advances and developments in molecular and biotechnological tools have contributed to ease and wider this mission. This book provides up-to-date findings that will be of greater use for the students and researchers, particularly Plant Physiologists, Environmental Scientists, Biotechnologists, Botanists, Food Scientists, and Agronomists, to get the information on the recent advances on this plant family in regard to physiology and stress tolerance.

**Closed Loop Neuroscience** Ahmed El Hady, 2016-09-08 *Closed Loop Neuroscience* addresses the technical aspects of closed loop neurophysiology, presenting the implementation of these approaches spanning several domains of neuroscience from cellular and network neurophysiology through sensory and motor systems and then clinical therapeutic devices.
