The Handbook of New Zealand Mammals Carolyn King, David Forsyth, 2021-01-20 The Handbook of New Zealand Mammals is the only definitive reference on all the land breeding mammals recorded in the New Zealand region including the New Zealand sector of Antarctica It lists 65 species including native and exotic wild and feral living and extinct residents vagrants and failed introductions It describes their history biology and ecology and brings together comprehensive and detailed information gathered from widely scattered or previously unpublished sources The description of each species is arranged under standardised headings for easy reference Because the only native land breeding mammals in New Zealand are bats and seals the great majority of the modern mammal fauna comprises introduced species whose arrival has had profound effects both for themselves and for the native fauna and flora The book details changes in numbers and distribution for the native species and for the arrivals it summarises changes in habitat diet numbers and size in comparison with their ancestral stocks and some of the problems they present to resource managers For this third edition the text and references have been completely updated and reorganised into Family chapters The colour section includes 14 pages of artwork showing all the species described and their main variations plus two pages of maps

American Capitals Christian Montès, 2014-01-10 State capitals are an indelible part of the American psyche spatial representations of state power and

national identity Learning them by heart is a rite of passage in grade school a pedagogical exercise that emphasizes the importance of committing place names to memory But geographers have yet to analyze state capitals in any depth In *American Capitals* Christian Mont s takes us on a well researched journey across America from Augusta to Sacramento Albany to Baton Rouge shedding light along the way on the historical circumstances that led to their appointment their success or failure and their evolution over time While all state capitals have a number of characteristics in common as symbols of the state as embodiments of political power and decision making as public spaces with private interests Mont s does not interpret them through a single lens in large part because of the differences in their spatial and historical evolutionary patterns Some have remained small while others have evolved into bustling metropolises and Mont s explores the dynamics of change and growth All but eleven state capitals were established in the nineteenth century thirty five before 1861 but rather astonishingly only eight of the fifty states have maintained their original capitals Despite their revered status as the most monumental and historical cities in America capitals come from surprisingly humble beginnings often plagued by instability conflict hostility and corruption Mont s reminds us of the period in which they came about an era of pioneer and idealized territorial vision coupled with a still evolving American citizenry and democracy
