African Handbook of Climate Change Adaptation Nicholas Oguge, Desalegn Ayal, Lydia Adeleke, Izael da Silva, 2021-05-20 This open access book discusses current thinking and presents the main issues and challenges associated with climate change in Africa. It introduces evidences from studies and projects which show how climate change adaptation is being and may continue to be successfully implemented in African countries. Thanks to its scope and wide range of themes surrounding climate change the ambition is that this book will be a lead publication on the topic which may be regularly updated and hence capture further works. Climate change is a major global challenge. However some geographical regions are more severely affected than others. One of these regions is the African continent. Due to a combination of unfavourable socio economic and meteorological conditions African countries are particularly vulnerable to climate change and its impacts. The recently released IPCC special report Global Warming of 1.5°C outlines the fact that keeping global warming by the level of 1.5°C is possible but also suggested that an increase by 2.0°C could lead to crises with crops agriculture fed by rain could drop by 50% in some African countries by 2020 and livestock production could damage water supplies and pose an additional threat to coastal areas. The 5th Assessment Report produced by IPCC predicts that wheat may disappear from Africa by 2080 and that maize a staple will fall significantly in southern Africa. Also arid and semi arid lands are likely to increase by up to 8% with severe ramifications for livelihoods poverty eradication and meeting the SDGs. Pursuing appropriate adaptation strategies is thus vital in order to address the current and future challenges posed by a changing climate. It is against this background that the African Handbook of Climate Change Adaptation is being published. It contains papers prepared by scholars representatives from social movements practitioners and members of governmental agencies undertaking research and or executing climate change projects in Africa and working with communities across the African continent. Encompassing over 100 contributions from across Africa it is the most comprehensive publication on climate change adaptation in Africa ever produced.

this area has been done by financial technology The purpose of this study is threefold 1 to present the role of financial technologies in financing SMEs 2 to examine the role of entities based on financial technology in financing SMEs in developing countries and 3 to consider other non bank aspects of financing SMEs leading to the improvement of the financial situation of these entities The in depth analysis of these entrepreneurial finance practices will be developed in the following papers presented in this Issue METHODOLOGY This study employs a theoretical approach based on a narrative literature review The primary attention is focused on applying financial technology as a stimulant for the finance of SMEs in developing countries FINDINGS As a consequence of the financing gap for SMEs within the traditional financial system these entities use non bank financing based on financial technology The research confirms that financial technology plays a crucial role in fostering the financial situation of SMEs in developing countries and providing greater financial inclusion for these entities Both financial technology and enterprises based on this technology contribute significantly to the improvement of efficiency of financing SMEs in emerging markets They also provide a broader range of services than were offered by the traditional financial sector Regarding the other aspects of SME finance it is essential to implement such ways of financing like microfinance services and crowdfunding Such funding mechanisms together with the budget process and the compliance under the conditions of e tax systems are important determinants of current entrepreneurial finance IMPLICATIONS The paper describes the financing of SMEs in developing countries The in depth picture of the SME s financial situation focusing on the technological development in this area provides essential insight into this still poorly explored area It also offers important premises for shaping the post pandemic policy to support their further growth ORIGINALITY VALUE Despite growing theoretical and empirical literature about entrepreneurial finance this study aims to contribute to the role of financial technology in this area The impact of financial technologies and the role of fintech based entities on SME activity in developing countries are still poorly researched Moreover the research provides a brief overview of other SME funding sources and their determinants in this group of countries

Youth and Popular Culture in Africa Paul Ugor,2021 The edited collection focuses on the links between young people and African popular culture It explores popular culture produced and consumed by young people in contemporary Africa And by culture we mean all kinds of texts or representations visual oral written performative fictional social and virtual created by African youth mostly about their lives and their immediate societies and for themselves but also consumed by the larger public and shared locally and globally We proceed from the premise that cultural texts not only function as social facts as Karin Barber argues but that they double as commentaries upon and interpretations of social facts They are part of social reality but they also take up an attitude to social reality 2007 04 So the work focuses specifically on what African youth

produce as popular culture under what conditions or contexts they produce such work how they produce those texts why they produce them the aesthetic dimensions of these texts as cultural artifacts and why these textual practices matter as social facts as interpretive acts and as cultural symbols of the general cultural activism of young people in a rapidly changing world a world where the global cultural economy is the prime terrain for the relentless struggles over the meanings that come to shape political economic and social systems *The Palgrave Handbook of Contemporary Kenya* Wanjala S.
