Executive-legislative (Im)balance in the European Union Diane Fromage,Anna Herranz-Surrallés,2021-02-11 Ten years after the entry into force of the Lisbon Treaty has executive predominance in EU related matters disappeared How have executive legislative relations in the EU evolved over a crisis ridden decade from the financial and migration crises to Brexit and the COVID 19 pandemic The Lisbon Treaty could be expected to lead to the re balancing of powers in favour of parliaments for it significantly enhanced the roles of both the European Parliament and national parliaments A decade later the contributions to this edited volume examine for the first time in such an extensive breadth and from a multi level and cross policy perspective whether this has actually materialised They highlight that diverging tendencies may be observed and that important variations over time have occurred depending particularly on the occurrence of crises As stated in the fascinating epilogue by Peter Lindseth University of Connecticut School of Law this is an admirably coherent collective volume whose contributions provide an excellent overview of key aspects of executive legislative relations in the European system since the Treaty of Lisbon This edited volume will hence be of interest to both academics and practitioners interested in future reforms designed at the European and national levels to improve the EU s democratic quality

Economic Governance in Europe Federico Fabbrini,2016-01-29 The Euro Crisis and the legal and institutional responses to it have had important constitutional implications on the architecture of the European Union EU Going beyond the existing literature Federico Fabbrini s book takes a broad look and examines how the crisis and its aftermath have changed relations of power in the EU disaggregating three different dimensions 1 the vertical relations of power between the member states and the EU institutions 2 the relations of power between the political branches and the courts and 3 the horizontal relations of power

between the EU member states themselves The first part of the book argues that in the aftermath of the Euro crisis power has been shifting along each of these axes in paradoxical ways In particular through a comparison of the United States Fabbrini reveals that the EU is nowadays characterized by a high degree of centralization in budgetary affairs an unprecedented level of judicialization of economic questions and a growing imbalance between the member states in the governance of fiscal matters As the book makes clear however each of these dynamics is a cause for concern as it calls into question important constitutional values for the EU such as the autonomy of the member states in taking decision about taxing and spending the preeminence of the political process in settling economic matters and the balance between state power and state equality The second part of the book therefore devises possible options for future legal and institutional developments in the EU which may revert these paradoxical trends In particular Fabbrini considers the ideas of raising a fiscal capacity restoring the centrality of the EU legislative process and reforming the EU executive power and discusses the challenges that accompany any further step towards a deeper Economic and Monetary Union

Comparative Climate Change Litigation: Beyond the Usual Suspects Francesco Sindico, Makane Moïse Mbengue, 2021-01-21 This book is based on the acknowledgment that climate change is a multifaceted challenge that requires action on the part of all stakeholders including civil society and the notion that climate change is at a tipping point with urgent measures needed in the next decade Against this background civil society is turning its attention to the courts as a means to directly influence climate action partly because of the global scepticism towards the progress of global climate action despite the ongoing implementation of the Paris Agreement Focusing on the individual broadly representing civil society the book offers fresh perspectives on climate change litigation While most of the literature on climate change litigation examines the same specific jurisdictions mostly common law countries US and Australia in particular this book also considers specific countries in Asia Africa and Latin America with little or no climate change litigation It explores the reasons for the lack of litigation and discusses what measures should or could be taken to change this situation and push forward climate action Unlike other literature on the subject this book analyses climate change litigation using a scenario based methodology Combining rigorous academic analysis with a practical policy oriented focus the book provides valuable insights for a wide range of stakeholders interested in climate change litigation It appeals to civil society organisations around the world international organisations and law firms interested in climate change litigation
