Country gender assessment of agriculture and the rural sector Food and Agriculture Organization of the United Nations,2023-04-24 This abstract outlines the objectives of an assessment conducted by the Food and Agriculture Organization FAO of the United Nation in Palau The assessment identified three main challenges firstly the need to acknowledge and reflect the contributions of women to household and rural economies in policies strategies plans and programs Secondly gender inequalities limit the capacity of women in Palau to develop their potential Finally the recognition of gender equality as a driver to sustainable development is beginning to be incorporated into public policies strategies plans and programs These findings highlight the importance of addressing these challenges in order to achieve greater gender equality and empowerment for rural women in Palau

Nitrogen in Agriculture Khan Amanullah,Shah Fahad,2018-02-01 Nitrogen is the most yield restraining nutrient in crop production globally Efficient nitrogen management is one of the most important factor for improving nitrogen use efficiency field crops productivity and profitability Efficient use of nitrogen for crop production is therefore very important for increasing grain yield maximizing economic return and minimizing nitrous oxide N₂O emission from the fields and nitrate NO₃ leaching to ground water Integrated nitrogen management is a good strategy to improve plant growth increase yield and yield components grain quality and reduce environmental problems Integrated nitrogen management combined use of chemical organic bio fertilizers in field crop production is more resilient to climate change

Plant Biotechnology, Volume 2 Sangita Sahni,Bishun Deo Prasad,Prasant Kumar,2017-12-22 This volume is the second of the new two volume Plant Biotechnology set This volume covers many recent advances in the development of transgenic plants that have revolutionized our concepts of sustainable food production cost effective alternative energy strategies microbial biofertilizers and biopesticides and disease diagnostics through plant biotechnology With the advancements in plant biotechnology many of the customary approaches are out of date and an understanding of new updated approaches is needed This volume presents information related to recent methods of genetic transformation gene silencing development of transgenic crops biosafety issues microbial biotechnology oxidative stress and plant disease diagnostics and management Key features Provides an in depth knowledge of various techniques of genetic transformation of plants chloroplast and fungus Describes advances in gene silencing in plants Discusses transgenic plants

for various traits and their application in crop improvement Looks at genetically modified foods and biodiesel production Describes biotechnological approaches in horticultural and ornamental plants Explores the biosafety aspect associated with transgenic crops Considers the role of microbes in sustainable agriculture *Plant Biotechnology, Volume 1* Bishun Deo Prasad, Sangita Sahni, Prasant Kumar, Mohammed Wasim Siddiqui, 2017-12-22 This book first of this new two volume set provides an informative tour of the basics of biotechnology to recent advances in biotechnology Knowledge of new and fresh approaches is a prerequisite to solving plant biological problems and to this end the editors have brought together a group of contributors who address the most recent techniques and their applications in plant biotechnology The chapters discuss some recent techniques such as TILLING Targeting Induced Local Lesions In Genomes advances in molecular techniques to study diversity protein purification and methods and analysis in protein protein interaction detection The volume also covers molecular markers and QTL mapping including four chapters that deal with different molecular markers development of mapping populations and association mapping for dissecting the genetic basis of complex traits in plants in sufficient detail The knowledge of biotechnology techniques and their applications will be valuable for researchers and scientists as well as for the many students engaged in plant biotechnology studies Transforming Tertiary Agricultural Education in Africa David Kraybill, John Lynam, Adipala Ekwamu, 2021-11-24 Enormous changes are affecting African production agriculture urbanization and food consumption patterns requiring new approaches to training and knowledge generation and dissemination to achieve food security Many agricultural universities and other tertiary agricultural education TAE organizations have been slow to respond hindered by inadequate staffing and facilities and growing competition for funds However some African agricultural universities are transforming themselves and are achieving remarkable success This book documents successful approaches to remaking TAE in Africa to inspire leaders both formal and informal of other TAE organizations It emphasises adaptive strategies and processes creating an internal culture driven by stakeholder needs and where organizational transformation improves the quality and relevance of teaching research and outreach The chapters cover the role of TAE in agricultural transformation trends in TAE in Africa solutions to the rigour versus relevance dilemma curriculum design informed by actual and emerging labour market conditions innovation and entrepreneurship TAE quality assurance and networking among TAE institutions **Vrikshayurveda** Avinash Khair, 2025-08-01 Since the evolution of unicellular organisms the skill of eating for survival has reached different levels contributing to a happier healthier and more peaceful existence for both flora and fauna In this process scientific principles have been applied In the Indian context the science of human health is known as Ayurveda The Sanskrit word Ayur means life and Veda means knowledge or science Thus Ayurveda refers to the science of health or the science of life The Sanskrit word for tree is Vriksha When combined with Ayurveda the term becomes Vrikshayurveda which translates to the science of tree life Plants which serve as a major source of food and medicine for humans were studied using the principles of Ayurveda and these findings were recorded as

Vrikshayurveda This book aims to encourage readers to think and act courageously in finding new avenues to create a happy healthy and peaceful life for both humans and plants so that plants in turn can provide the same benefits to mankind carrying forward the legacy of our ancestors At the same time readers must keep in mind that the knowledge passed down from our ancestors is time tested truly scientific and unbiased In this regard M J Filliozat Professor at the Coll ge de France states in the Journal of World History that Research in ancient India led very early to the development of theories which although ahead of their time were nevertheless logical systems of thought about the structure of reality that is to say of science His observations specifically refer to astronomy and physiology as discussed in texts dating between 1500 BC and 500 BC This statement is also applicable to Vrikshayurveda as both astronomy and plant physiology are important components of it Further research based on the principles of Vrikshayurveda is essential because if the future of mankind is organic then its foundation lies in Vrikshayurveda A Nexus Approach for Sustainable Development Stephan Hülsmann, Mahesh

Jampani, 2020-11-10 This book explores how integrated management of environmental resources via a nexus approach can help in achieving the respective Sustainable Development Goals SDGs It provides conceptual considerations but mainly practical examples on how to implement a nexus approach in cities and multifunctional land use systems to increase resource use efficiency and develop a low carbon economy After sketching out the background and conceptual outline contributions to the book explore key aspects of the nexus implementation Specifically they Demonstrate how to sustainably use organic waste and wastewater for agriculture Explore examples on how to manage multifunctional land use systems including multipurpose reservoirs Highlight the importance of economic incentives for successful nexus implementation and Provide a comprehensive perspective on challenges and opportunities of implementation considering peer to peer learning indigenous knowledge and stakeholder participation The chapters in this book shed a new light on key aspects of the interrelation between SDGs and the nexus approach in resilient cities and multifunctional land use systems and provide specific examples on how to advance sustainable resources management **Plant Growth Regulators for Climate-Smart Agriculture**

Shah Fahad, Osman Sonmez, Shah Saud, Depeng Wang, Chao Wu, Muhammad Adnan, Veysel Turan, 2021-07-27 Climatic conditions are key determinants of plant growth whether at the scale of temperature regulation of the cell cycle or at the scale of the geographic limits for a particular species The climate is changing due to human activities particularly the emission of greenhouse gases therefore the conditions for the establishment growth reproduction survival and distribution of plant species are changing In contrast to animals plants are able to cease and resume growth This flexibility in their architecture and growth pattern is partly achieved by the action of plant hormones Still the role of plant growth regulators PGRs in agriculture is modest compared to other agrochemicals such as fungicides herbicides and insecticides Plant Growth Regulators for Climate Smart Agriculture is an invaluable guide to the varied roles filled by PGRs in the attainment of higher quality better yielding crops Salient Features minimum 5 Explores plant growth regulators and anthropogenic climate

change Provides new insights related to hormonal cross talk in plant development and stress responses Sheds new light on the role of PGRs in agriculture in the attainment of higher quality better yielding crops Delivers valuable information on physiological and molecular mechanisms linked to the role of plant growth regulators in stress tolerance Provides valuable knowledge for students of agronomy plant physiology molecular biology and environmental sciences *Geosciences and the Sustainable Development Goals* Joel C. Gill,Martin Smith,2021-04-12 Meeting the targets of the UN Sustainable Development Goals SDGs requires contributions by scientists focusing on understanding monitoring protecting managing and restoring the natural environment including geoscientists This book presents the first detailed discussion on the role of the geological sciences geosciences community in the implementation of the SDGs Unlike traditional geosciences textbooks it is structured according to development priorities framed in the context of the 17 SDGs Written by international experts from diverse range of geosciences development disciplines it explores themes linked to both science and the professional practice of science e g ethics equity conduct and partnerships The book is intended for graduate and senior undergraduate students in the earth sciences as well as practicing geologists and experts from other sectors involved in sustainability initiatives Birds in Agriculture Dr. Raju Kasambe,2020-04-15 Birds in Agriculture The e Book in English language is about the common and widespread birds found in the agriculture landscape in India The book describes 111 species of birds with their role on agriculture in brief The book discusses the benefits of birds to agriculture and also methods of management of birds in agriculture The purpose of the e Book is to spread knowledge about the benefits birds offer to agriculture in India and their importance The author being the son of a farmer and an ornithologist with BNHS is familiar with the birds in agriculture
