Integrated Safety and Risk Assessment for Medical Devices and Combination Products Shayne C. Gad, 2020-02-24 While the safety assessment biocompatibility of medical devices has been focused on issues of local tissue tolerance irritation sensitization cytotoxicity and selected quantal effects genotoxicity and acute lethality since first being regulated in the late 1950s this has changed as devices assumed a much more important role in healthcare and became more complex in both composition and in their design and operation Add to this that devices now frequently serve as delivery systems for drugs and that drugs may be combined with devices to improve device performance and the problems of ensuring patient safety with devices has become significantly more complex A part of this requirements for ensuring safety once based on use of previously acceptable materials largely polymers and metals have come to requiring determining which chemical entities are potentially released from a device into patients and how much is released Then an appropriate and relevant yet also conservative risk assessment must be performed for each identified chemical structure The challenges inherent in meeting the current requirements are multifold and this text seeks to identify understand and solve all of them Identify and verify the most appropriate available data As in most cases such data is for a different route of exposure transform it for use in assessing exposure by the route of interest As the duration and rate of exposure to moieties released from a device are most frequently different longer than what available data speaks to transformation across tissue is required As innate and adaptive immune responses are a central part of device patient interaction assessing potential risks on this basis are required Incorporating assessments for special populations such as neonates Use of Q SAR Quantitative Structure Activity Relationships modeling in assessments Performance and presentation of integrative assessments covering all potential biologic risks Appendices will contain summarized available biocompatibility data for commonly used device materials polymers and metals and safety assessments on the frequently seen moieties in extractions from devices

Bhutan: Conservation and Environmental Protection in the Himalayas

Ugyen Tshewang, Michael Charles Tobias, Jane Gray Morrison, 2021-01-15 Located in the heart of the Eastern Himalayas Bhutan practices the philosophy of Gross National Happiness GNH that embraces environmental conservation as one of the main building blocks for its sustainable development goals Bhutan's conservation strategies and success are largely driven by the strong political will and visionary leadership of His Majesty the King of Bhutan The nation's Buddhist perspectives regarding a deep and abiding respect for nature and the strategic enforcement of a wide ranging stringent set of internal regulations and controls have helped ensure ecological gold standards in Bhutan Moreover the country is an active member of the international conservation community by fulfilling its implementation of various Multilateral Environment Agreements While it emerged into the 21st century as one of the 36 global terrestrial hotspots in biological diversity conservation ranks Bhutan's sheer commitment with more than 51% of its territory being managed under the explicit status of a protected area network and more than 70% of the land under forest cover represents Bhutan's exemplary dedication to protect the planet despite its smallness in size and economy and the biological fragility exemplified by its hotspot situation In the face of imminent severe threats of global warming Bhutan nonetheless exemplifies the truth that a small country with a big conservation commitment can make an enormous contribution to the global community At the regional level Bhutan is intent upon protecting the Water Towers of Asia that glacial expanse of the Himalayas which is a critical resource bulwark for about one fifth of the global population downstream in South Asia Such protections invariably help mitigate climate change by acting as a nation wide carbon sink through its carbon neutral policies In short Bhutan has long represented one of the world's foremost national guardians of biodiversity conservation ecological good governance and societal sustainability at a period when the world has entered the Anthropocene an epoch of mass extinctions We envision this publication to be ecologically and ethically provocative and revealing for the concerned scientific communities and governments Through an extensive review of the scientific and anthropological literature as well as the research team's own data the Author's have set forth timely recommendations for conservation policies strategies and actions This book provides technical and deeply considered assessments of the state of Bhutan's environment its multiple human induced stressors and pressures as well as extremely sound practical techniques that would address conservation strategies in the Himalayas and by implication worldwide

A System-Theoretic Safety Engineering Approach for Software-Intensive Systems Asim Ali Ahmed

Abdulkhaleq,2017-02-23 Software safety is a crucial aspect during the development of modern safety critical systems However safety is a system level property and therefore must be considered at the system level to ensure the whole system s safety In the software development process formal verification and functional testing are complementary approaches which are used to verify the functional correctness of software however even perfectly reliable software could lead to an accident The correctness of software cannot ensure the safe operation of safety critical software systems Therefore developing safety critical software requires a more systematic software and safety engineering process that enables the software and safety engineers to recognize the potential software risks For this purpose this dissertation introduces a comprehensive safety engineering approach based on STPA for Software Intensive Systems called STPA SwISs which provides seamless STPA safety analysis and software safety verification activities to allow the software and safety engineers to work together during the software development for safety critical systems and help them to recognize the associated software risks at the system level

Ontology Engineering with Ontology Design Patterns: Foundations and Applications P. Hitzler,A. Gangemi,K. Janowicz,2016-09-16 The use of ontologies for data and knowledge organization has become ubiquitous in many data intensive and knowledge driven application areas in science industry and the humanities At the same time ontology engineering best practices continue to evolve In particular modular ontology modeling based on ontology design patterns is establishing itself as an approach for creating versatile and extendable ontologies for data management and integration This book is the very first comprehensive treatment of Ontology Engineering with Ontology Design Patterns It contains both advanced and introductory material accessible for readers with only a minimal background in ontology modeling Some

introductory material is written in the style of tutorials and specific chapters are devoted to examples and to applications. Other chapters convey the state of the art in research regarding ontology design patterns. The editors and the contributing authors include the leading contributors to the development of ontology design pattern driven ontology engineering. Child Development Laura E. Levine, Joyce Munsch, 2020-10-15. In the topically organized Child Development: An Active Learning Approach, Fourth Edition, authors Laura E. Levine and Joyce Munsch take students on an active journey toward understanding children and their development. Active Learning activities integrated throughout the text capture student interest and turn reading into an engaged learning process. Through the authors' active learning philosophy, students are challenged to test their knowledge, confront common misconceptions, relate the material to their own experiences, and participate in real-world activities independently and with children. Because consuming research is equally important in the study of child development, Journey of Research features provide both historical context and its links to today's cutting-edge research studies. Students will discover the excitement of studying child development while gaining skills they can use long after course completion. This title is accompanied by a complete teaching and learning package. **Safety and Security Engineering VI** C.A. Brebbia, F. Garzia, D. Poljak, 2015-05-06.
