Christianity Ujulu Tesso Benti, 2018-05-31 The early non Oromo writers have distorted the history of the Oromo Without scientific research they were speaking of the so called Oromo migration of the 16th century Against the unscientific thesis of the early scholars this work confirmed the Oromo to be not only the indigenous African peoples but also belong to the Cushitic Africans who invented the first world civilization Their egalitarian and holistic culture the gadaa system is part of the ancient Cushitic civilization It is the base for modern democratic system of governance The root word of gadaa is originated from Ka the creator God of the ancient religion of the Cushitic Africans From this very name Ka originated the Oromo word Waaqa which also means creator of everything This shows that the Oromo are among the first nations who came up with the idea of monotheism Therefore this work disqualifies the missionary assumptions describing the Oromo Indigenous Religion OIR as Satanism and its religious experts the Qaalluus as witchdoctors or sorcerers This dissertation discovered many identical similar partial similar and few differing elements between the Oromo Indigenous Religion OIR and Oromo Christianity OC Also the study identified many Oromo cultural elements that are compatible to Christianity therefore must be adopted by the Oromo Christianity According modern scholarship God revealed himself in every human culture and religion is part of human culture Therefore no religion can claim to be the only true religion Based on this principle this dissertation calls all leaders of religious institutions in Oromia to change their attitude develop culture of tolerance conduct constructive religious dialogue create the atmosphere of peaceful coexistence of all religions and establish sustainable peace that serves humanity

Corruption Scandals and their Global Impacts Omar E. Hawthorne, Stephen Magu, 2018-05-11 Corruption scandals receive significant press coverage and scrutiny from practitioners of global governance and bilateral and multilateral donors Across the globe the annual publication of TI's CPI and World Bank's Worldwide Governance Indicators elicits spirited denials and accusations of targeting of neo colonialism Poor measures on corruption indices and the ensuing negative publicity can have serious consequences both externally through a freeze or retraction of donor funding and internally through reducing the availability of public funds and harming the credibility of serving governments and institutions

Corruption Scandals and their Global Impacts tracks several major corruption scandals across the world in a comparative analysis to assess the full impact of global corruption. Over the course of the book, the contributors deliberate the exposure and reporting of corruption scandals, demonstrate how corruption inhibits development on different levels and across different countries, the impact it has on the country in question, how citizens and authorities respond to corruption, and some local, regional, and global policy and legislative measures to combat corruption. The chapters examine the transnational manifestation of corruption scandals around the world from developed countries and regions such as the United States and the European Union to BRIC countries Brazil and Russia to developing countries such as Belarus, Jamaica, Kenya, and Nigeria. In each case, chapters highlight the scandal, its impact, the local, regional, and global responses, and the subsequent global perceptions of the country. Concluding with a review of the global impacts of corruption scandals, this book provides an important comparative analysis which will be useful to students and scholars of international development and politics, as well as to development practitioners, donors, politicians, and policy makers.

[Do You Believe In Magic? \(A Wild Thing Book\)](#) Laura Krantz, 2024-10-08. Inspired by her popular Wild Thing podcast, journalist Laura Krantz incorporates the scientific method and her journalistic skills to determine if magic might be real. In *Do You Believe in Magic*, Magic spells and curses, hexes and potions, superstition and rituals. We've all heard stories of alchemists attempting to turn abundant lead into precious rare gold. Or of poor, unfortunate souls asking potion masters to brew up unappetizing concoctions that will help them find love. And of course, we're familiar with curses, muttering magical words for the purposes of exacting revenge on an enemy or protecting a hidden treasure. Who wouldn't like the idea of special powers or control over the natural world? It seems pretty fun, even if it's just the stuff of fantasy books and movies. But a lot of what we call magic has grounding in real practices. In fact, magic is at the root of many scientific fields, from chemistry to botany to astronomy, and has been an important part of human culture for thousands of years. *Do You Believe in Magic* takes readers through a world where magic and science collide. What do they have in common? Where do they differ? What role has magic played in our

history and the history of science Why is magic still significant even when it doesn't seem to line up with reality And is it possible to be scientifically minded and still believe in magic Readers are encouraged to weigh the facts and go beyond their gut assumptions to stretch their imaginations and think about why magic and science might be two sides of the same coin Includes color illustrations an at home science magic experiment glossary bibliography and index A Wild Thing series The Search for Sasquatch Is There Anybody Out There Do You Believe in Magic
