Knowledge for a Sustainable World

The search for answers to the issue of global sustainability has become increasingly urgent. In the context of higher education, many universities and academics are seeking new insights that can shift our dependence on ways of living that rely on the exploitation of so many and the degradation of so much of our planet. This is the vision that drives SANORD and many of the researchers and institutions within its network. Although much of the research is on a relatively small scale, the vision is steadily gaining momentum, forging dynamic collaborations and pathways to new knowledge. The contributors to this book cover a variety of subject areas and offer fresh insights about chronically under-researched parts of the world. Others document and critically reflect on innovative approaches to cross-continental teaching and research collaborations. This book will be of interest to anyone involved in the transformation of higher education or the practicalities of cross-continental and cross-disciplinary academic collaboration. The Southern African-Nordic Centre (SANORD) is a network of higher education institutions from Denmark, Finland, Iceland, Norway, Sweden, Botswana, Namibia, Malawi, South Africa, Zambia and Zimbabwe. Universities in the southern African and Nordic regions that are not yet members are encouraged to join.

This is a book about the variegated frontlines of value within an uneven, but not random, geography of capitalist expansion.

Urban Nature Michelle L. Cocks, Charlie M. Shackleton, 2020-11-15 This book showcases the diversity of ways in which urban residents from varying cultural contexts view, interact, engage with, and give meaning to urban nature, aiming to counterbalance the dominance of Western depictions and values of urban nature and design Urban nature has up to now largely been defined, planned, and managed in a way that is heavily dominated by Western understandings, values, and appreciations, which has spread through colonialism and globalisation As cities increasingly represent a diversity of cultures and urban nature is being increasingly recognised as contributing to residents' wellbeing, belonging, and overall quality of life, it is important to consider the numerous ways in which urban nature is understood and appreciated This collection of case studies includes examples from Africa, Asia, Europe, North, and South America and reflects on the multi-dimensional aspects of engagements with urban nature through a biocultural diversity lens The chapters cover several themes, such as how engagements with nature contribute to a sense of wellbeing and belonging, the implications that diversity has on the provision, design, and management of urban environments, and the threats inhibiting residents' abilities to engage meaningfully with nature The book challenges the dominant discourse, Western ideological understandings, and meta-narratives of modernisation and unilineal urban transitions A timely addition to the literature *Urban Nature: Enriching, Belonging, Wellbeing, and Bioculture* offers an alternative to Western ideological understandings of nature and values and will be of great interest to those working in human and environmental urban ecology It will also be key reading for students in the relevant fields of anthropology, development studies, geography, social ecology, and urban studies
