Shaw,Nancy Staton Barbour,Patti Duncan Ph.D.,Kryn Freehling-Burton Ph.D.,Jane Nichols,2018-01-04 Providing an in depth look at the lives of women and girls in approximately 150 countries this multivolume reference set offers readers transnational and postcolonial analysis of the many issues that are critical to the success of women and girls For millennia women around the world have shouldered the responsibility of caring for their families But in recent decades women have emerged as a major part of the global workforce balancing careers and family life How did this change happen And how are societies in developing countries responding and adapting to women s newer roles in society This four volume encyclopedia examines the lives of women around the world with coverage that includes the education of girls and teens the key roles women play in their families careers religions and cultures how issues for women intersect with colonialism transnationalism feminism and established norms of power and control Organized geographically each volume presents detailed entries about the lives of women in particular countries Additionally each volume offers sidebars that spotlight topics related to women and girls in specific regions or focus on individual women s lives and contributions Primary source documents include sections of countries constitutions that are relevant to women and girls United Nations resolutions and national resolutions regarding women and girls and religious statements and proclamations about women and girls The organization of the set enables readers to take an in depth look at individual countries as well as to make comparisons across countries      An Introduction to Population Geographies Holly R. Barcus,Keith Halfacree,2017-09-01 An Introduction to Population Geographies provides a foundation to the incredibly diverse topical and interesting field of twenty first century population geography It establishes the substantive concerns of the subdiscipline acknowledges the sheer diversity of its approaches key concepts and theories and engages with the resulting major areas of academic debate that stem from this richness Written in an accessible style and assuming little prior knowledge of topics covered yet drawing on a wide range of diverse academic literature the book s particular originality comes from its extended definition of population geography that

locates it firmly within the multiple geographies of the life course. Consequently issues such as childhood and adulthood, family dynamics, ageing, everyday mobilities, morbidity, and differential ability assume a prominent place alongside the classic population geography triumvirate of births, migrations, and deaths. This broader framing of the field allows the book to address more holistically aspects of lives across space, often provided little attention in current textbooks. Particular note is given to how these lives are shaped through hybrid social, biological, and individual arenas of differential life course experience. By engaging with traditional quantitative perspectives and newer qualitative insights, the authors engage students from the quantitative macro scale of population to the micro individual scale. Aimed at higher level undergraduate and graduate students, this introductory text provides a well developed pedagogy including case studies that illustrate theory, concepts, and issues.

### **Exploring the Role of Foreign Investors in Russia's Local Currency Government Bond (OFZ) Market**

Yinqiu Lu, Dmitry Yakovlev, 2017-02-20. Local currency government bonds (OFZ bonds) are an important fixed income instrument in Russia's financial markets. In this paper, based on granular data, we explore the development of the OFZ bond market with a focus on foreign investors. As this fixed income market has experienced a liberalization of the domestic trading and settlement infrastructure and weathered several episodes of market stresses since the 2008-09 global financial crisis, the role of foreign investors can be observed along with these events. What we have found is that foreign investors had influenced the market before they became an important player, and since then they have contributed to the development of the market while not necessarily destabilizing it in episodes of shocks.

### **Russian Federation**

International Monetary Fund, European Dept., 2017-07-10. This 2017 Article IV Consultation highlights that the Russian economy stabilized in 2016, contracting by just 0.2 percent of GDP after being hit in 2014 by the dual shocks of lower oil prices and sanctions. The more stable oil prices and improved financial conditions will support a return to growth in 2017, with an expected increase in real GDP of 1.4 percent. Growth is forecast to continue at 1.4 percent in 2018. With adverse demographics and barring significant structural reforms that lift productivity, potential growth is likely to stay at about 1.50 percent over the medium term. The main risk to the outlook remains a fall in oil prices.

### **China, the Belt and Road Initiative, and the Century of Great Migration**

Michele Bruni, 2022-04-13. The book argues whether future migrations will be organized by destination countries or by criminal organizations; whether migrants will travel in a humane way or will continue to die along the road; whether properly trained migrants will boost the productivity of arrival countries or these countries will continue to squander money to build useless walls possibly far from their border and pay neighbours not certainly in the top list from the human right perspective to keep workers they need in concentration camps. It suggests that it is in the interest of more developed countries to stop denying their structural shortage of labour and start co-managing with one or more potential departure countries; migration flows coherent with the quantitative and qualitative needs of their labour market. Economic fairness and sound economic thinking would also require destination countries to finance the training of potential migrants in

the country of departure in substance to build schools and vocational centres not walls China represents an ideal case study in this regard not only because of its history institutional setting and international relationships but because in the next decades it will be the country most affected by the largest shortage of labour

**Airline Operations Control** Peter J. Bruce, Chris Mulholland, 2020-12-28 This text is among the first to reveal the intricacies of an airline's Operations Control Centre especially the thought processes information flows and strategies taken to mitigate disruptions Airline Operations Control provides a deep level of description explanation and detail into the activities of a range of highly professional and expert staff managing the sharp end of the airline It aims to fill a void as little is understood about this area and very little is written for practitioners in the airline business The book offers a comprehensive look at the make up of the Operations Centre its component sections and the processes that occur both in preparing for and executing the current day's schedules Several chapters provide real life scenarios and demonstrate how Operations Centres manage evolving situations what they need to take into account and how they need to have Plan B and Plan C ready when things don't go right This book is designed to deliver knowledge gains to both new and experienced aviation industry practitioners with regards to vital operational aspects Additionally it also offers students of air transport management a readily accessible and real world perspective guide to a crucial function present within every airline

*Population and Society* Dudley L. Poston, Jr, Leon F. Bouvier, 2016-12-28 This comprehensive yet accessible textbook is an ideal resource for undergraduate and graduate students taking their first course in demography Clearly explaining technical demographic issues without using extensive mathematics Population and Society is sociologically oriented but incorporates a variety of social sciences in its approach including economics political science geography and history It highlights the significant impact of decision making at the individual level especially regarding fertility but also mortality and migration on population change The text engages students by providing numerous examples of demography's practical applications in their lives and demonstrates the extent of its relevance by examining a wide selection of data from the United States Africa Asia and Europe This thoroughly revised edition includes four new chapters covering topics such as race and sexuality and encourages students to consider the broad implications of population growth and change for global challenges such as environmental degradation

**Cardiovascular Remodeling** Yan Yang, Yi Zhang, Ming Lei, Gui-Rong Li, 2023-08-25 Although the treatment has greatly progressed the mortality of cardiovascular diseases remains the leading cause of death worldwide Serious cardiovascular diseases e.g myocardial infarction heart failure cardiac dysrhythmias and stroke are resulted from cardiovascular remodeling secondary to the cardiovascular risk factors including hypertension atherosclerosis cigarette smoking diabetes mellitus hyperlipidemia aging etc Cardiac remodeling involves a series of molecular cellular and interstitial alterations which manifest clinically as changes in size mass geometry and function of the heart In addition vascular remodeling is an active process of structural alteration involving vascular wall thickening and lumen stenosis due to endothelial injury vascular smooth muscle cell

proliferation and matrix deposition This results in atherosclerosis and or stenosis followed by myocardial infarction stroke etc Thus studies on the mechanism of cardiovascular remodeling and new therapeutic approaches are important scientifically and clinically Cardiovascular remodeling is a response of specific cardiovascular cells including cardiomyocytes endothelial smooth muscle cells and interstitial cells to noxious hemodynamic metabolic and inflammatory stimuli The remodeling may initially be functional compensatory and adaptive but it progresses to structural alterations that become pathogenic when the damaging stimuli are sustained The mechanism of cardiovascular remodeling is complex and recent studies focus on improving and or reversing the remodeling by clarifying molecular mechanisms and identifying novel therapies Pharmacological anti remodeling RNA based long non coding RNA and microRNA treatment cell based iPS cardiac repair and cell free exosome approaches have been shown to improve cardiovascular remodeling alongside proangiogenic pro survival proliferative and immunogenic factors stimulating endogenous proliferative potential of cardiomyocytes However though advanced studies have progressed the prognosis of the affected patients remains poor Therefore understanding novel mechanisms identifying remodeling biomarkers and developing new therapeutic drugs and approaches can lead to new therapeutic options for treating patients with cardiovascular diseases Brazil in the Anthropocene Liz-Rejane Issberner,Philippe Léna,2016-12-19 This book examines Brazil s position in the global ecological crisis and how social political ethical scientific and economic issues affect its environmental performance **Official Summary of Security Transactions and Holdings Reported to the Securities and Exchange Commission Under the Securities Exchange Act of 1934 and the Public Utility Holding Company Act of 1935** United States.
