**Figure 2** – Median percentage of quarterly sales in a company in 2014, by annual percentage change in sales from 2013. Quarterly sales were calculated as the average of the four quarterly sales figures for each company. The data is sorted by the annual percentage change in sales from 2013 to 2014. The x-axis represents the annual percentage change in sales from 2013 to 2014, ranging from -10% to 10%. The y-axis represents the median percentage of quarterly sales in a company, ranging from 0% to 100%. The data points are represented by blue dots. A horizontal line is drawn at 25% on the y-axis. A vertical line is drawn at 0% on the x-axis. The data points are clustered around the 25% line on the y-axis, with a slight upward trend as the annual percentage change in sales increases.

2. The respondents' perception of the quality of the services was also measured using the independent set of questions for the three service settings (i.e. school, community-based, and in-home) separately.
