Lee, 2019-09-23 *Caring for Creation* argues that progress has been made in areas such as protection of endangered species the sustainable agriculture movement and recycling While much remains to be done in these and other areas this progress is cause for optimism about the future In substantial measure the American experience is the story of environmental destruction and degradation deforestation annihilation of species contamination of surface water and ground water and much more At the same time the American experience is also the story of triumph the preservation of threatened and endangered species such as American bison and bald eagles new farming methods that reduce environmental impact impressive gains in recycling This volume documents those crises and successes Today we face new challenges among them climate change which if not slowed down will have devastating consequences There is also more work to be done in areas in which progress has been made including protection of endangered species and recycling Yet this volume argues as we look at the progress that has been made we may embrace the future with hope The work contends that if we live our lives in ways conducive to the wellbeing of the biotic communities that sustain life and support candidates for public office and organizations committed to environmental protection our children and grandchildren will have the opportunity to experience the goodness of a flourishing creation **Solongus4**

Operation Anaconda Lester W. Grau,Dodge Billingsley,2011-11-25 Long before it became Obama s War the long running conflict in Afghanistan was launched by President George W Bush in retaliation for the 9 11 attacks on the United States Only a few months later Operation Anaconda sent American led coalition forces into their most intensely brutal confrontation with Al Qaeda and their Taliban hosts in the Shar i Kot Valley near the Pakistan border The result was an unexpected set

piece of conventional fighting in what has become an era of guerrilla warfare Drawing upon previously unavailable or neglected sources Lester Grau and Dodge Billingsley give us the most complete and accurate account of this thirteen day firefight waged in mountainous terrain nearly two miles above sea level They describe how allied troops fought a fierce and well entrenched enemy to a standstill close to an old Soviet battlefield and then drove them completely out of Afghanistan Grau and Billingsley s account also highlights problems encountered in Anaconda and the lessons we should learn from their in depth study The Army and Air Force operated under conflicting views regarding the appropriate application of Close Air Support and airpower both crippled and aided the overall effort In addition severe shortages of transport attack helicopters and artillery hampered the effort while the acquisition and timely sharing of intelligence barely occurred at all and coalition relations frayed under the intense pressures of combat As an added bonus the authors also include with the book a documentary on DVD that features interviews with soldiers who fought in Anaconda provides additional information concerning major phases of the battle and presents insightful commentary by Grau and by Billingsley who was on the ground with U S forces for the operation Providing the richest description and critique of all the forces involved including those that fought on the enemy side the combined book and DVD surpasses all previous accounts of this landmark engagement and is an essential volume in the literature on our war in Afghanistan
