Mitchell Electronic Fuel Injection ,1995 **The New Cosmos** A. Unsöld,B. Baschek,2013-04-17 to the Second Edition The development of astronomy in the last ten years has been nothing short of explosive This second edition of The New Cosmos considerably revised and enlarged tries to share this development with its readers Let us mention a few key words from mo on landings planetary probes aild continental drift through pulsars X ray and y ray sources interstellar molecules quasars and the structure and evolution of stars and stellar systems right up to cosmological models As before the most important task of this book is to give a not too difficult introduction to present day astronomy and astrophysics both to the student of astronomy and to the specialist from a neighboring discipline We therefore draw to the attention of the reader as an essential part of our description the numerous illustrations many of them new and their detailed captions As far as possible we link a description of important observations with basic features of the theory On the other hand when it comes to detail we often content ourselves with abrief description leaving the detailed explanation to the specialist literature The transition to the specialist literature should be eased by the Bibliography at the end of the book Important new investigations are noted in the text by their year not so much for historical reasons as to enable the original work to be found in the Astronomy and Astrophysics Abstracts 1969 on **Sky and Telescope** Charles Federer,1962 *The New Cosmos* Albrecht Unsöld,1977 Time Briton Hadden, Henry R.
