F & S Index International Annual ,1995 *More with Less* Bob Russell,1999-01-01 The massive changes under way in
 capitalist commodity production include the transition from a traditional or Fordist approach to a post Fordist one involving
 practices such as employee involvement continuous improvement and gainsharing In this research monograph Bob Russell
 explores the changing character of industrial relations and labour processes in two staple industries potash and uranium
 mining Using an innovative case analytic approach Russell compares the managerial strategies used by five transnational
 firms As indicated by his title *More with Less* he sees the shift toward post Fordism as having more to do with the
 intensification of labour accomplished in part through the creation of multitasked positions than with worker empowerment

and the transcendence of class conflict Russell combines extensive empirical analysis with a review of contemporary writing on work relations and labour processes to provide this intensive political economic perspective on the capital labour relation His meticulous research will interest scholars and professionals in Canada the United States Britain Europe and Australia
