Going Multinational Frédérique Sachwald,2013-01-11 At the beginning of the 1990s Korean firms

embarked on an impressive wave of direct investment abroad This dramatic multinationalization was considered as yet another sign of Korea s remarkable economic performance especially as a high proportion of the foreign ventures were located in advanced countries But this unbalanced quest for globalization actually tested the Korean model to its limits after the 1997 crisis a new policy prepared the way for a surge of inward investment Using empirical tests and case studies this collection shows that Korean groups have invested in developed countries to jump over trade barriers but also to source advanced technology and marketing capabilities Moreover their ambitious strategies have been stimulated by oligopolistic rivalry among the chaebols From a policy perspective the book provides an original discussion of national ownership by questioning the substitutability between inward and outward foreign investment and its relationship with the evolution of the national innovation system By shedding light on the pattern of Korea s internationalization these essays make a valuable contribution to the theory of international production and provide important insights for the current policy debates on globalization and innovation led growth
