However, despite widespread adoption of ICT in day to day life, digital health technologies have yet to catch on. To this end, technology needs to be effective, usable, cheap and designed to ensure the security of the managed data. In the era of mHealth, mobile technology and social design, this book describes in six sections the collaboration of polytechnic know how and social science and health sectors in the creation of a system for encouraging people to engage in healthy behavior and achieve a better quality of life.
