The Changing Military Balance in the Koreas and Northeast Asia Anthony H. Cordesman, Aaron Lin, 2015-07-07 The tensions between the Koreas and the potential involvement of China Japan Russia and the United States in a Korean conflict create a nearly open ended spectrum of possible conflicts These conflicts could range from posturing and threats to a major conventional conflict on the Korean peninsula with intervention by outside powers to the extreme of nuclear conflict The Korean balance is also affected by the uncertain mix of cooperation and competition between the United States and China particularly with the U S pivot toward Asia and the steady modernization of Chinese forces This new volume up to date through Spring 2015 provides a detailed examination of the military forces in Northeast Asia North and South Korea China Russia Japan and the United States setting those forces in the larger geostrategic context

Global Terrorism Threat Assessment 2025 Alexander Palmer, Riley McCabe, Daniel Byman, Skyeler Jackson, 2025-07-24 Terrorism remains a threat to U S citizens assets and interests despite the national security community s decreasing focus on counterterrorism In 2025 domestic terrorism represents a greater threat to the United States than do international terrorist organizations Most domestic terrorist attacks in the United States are carried out by lone actors or small groups who believe in a wide range of ideologies such as white supremacy partisan extremism and Salafi jihadism In the Middle East the Al Qaeda core Al Qaeda in the Arabian Peninsula and the Islamic State remain committed to conducting attacks against the U S homeland as well as U S

interests although all three are weaker than they were during their heydays Israel has degraded Hezbollah's and Hamas's capabilities while the Houthis have become a more active regional threat Africa remains the most active theater for Salafi jihadist organizations but the continent's groups are mostly tertiary priorities for the United States with the exception of East Africa's Al Shabaab This report consists of three regional assessments of the threat from terrorist groups and movements in the United States the Middle East including Afghanistan and Africa The purpose of this assessment is to help U.S. national security policymakers intelligence and law enforcement professionals and military decision makers prioritize among different terrorist threats Report to Congress of the U.S.-China Economic and Security Review Commission U.S.-China Economic and Security Review Commission,2014 **Annual Threat Assessment** Director of Nat'l Intelligence,2021-04 The American people should know as much as possible about the threats facing our nation and what their intelligence agencies are doing to protect them Avril Haines Director of National Intelligence 2021 Annual Threat Assessment of the US Intelligence Community 2021 is an annual report of worldwide threats to the national security of the United States compiled by the US Intelligence Community It warns of the many perils facing the US including China's increasing power the geopolitical risks of Russia Iran and North Korea the long term economic fallout of COVID 19 and global as well as domestic terrorism This brief report with its short term threat assessment is a good companion guide to Global Trends 2040 A More Contested World a 2021 report by the National Intelligence Council which describes specifically long term global challenges also available from Cosimo Reports Students of national security policymakers journalists and anyone interested in US security will find this report essential reading **Department of Defense's Role in Combating Terrorism and Force Protection Lessons Learned Since the Attack on the U. S. S. Cole** Jim Saxton,2001-04 NATO Towards the Challenges of a Contemporary World 2013 Robert Czulda,Robert Łoś,2013-12-26 A wide range of contemporary challenges and threats and their volatility uncertainty complexity and ambiguity make it necessary to develop a new flexible and integrated holistic approach The modern world requires NATO to build institutional partnerships with a range of actors This applies not only to the other major international organizations such as the United Nations and the European Union but also to non governmental organizations NGOs as well as the private sector for example the energy and IT sectors All these players must become partners in the attempt to cope with multi dimensional security related problems Given the vast differences in their goals mandates methods and philosophy of action building trusting and effective relationships between them will be an arduous process Nevertheless as the biggest political and military organization in the world NATO cannot avoid contemporary challenges if it does not want to go out of business Chinese Strategy and Military Power in 2014 Anthony H. Minimum Deterrence: Examining the Evidence Keith B. Payne, James Schlesinger, 2016-04-14 The National Institute for Public Policy's new book Minimum Deterrence Examining the Evidence is the first of its kind Dr Keith Payne former Secretary of Defense James Schlesinger and an unparalleled bipartisan group of senior civilian and military experts critically examine eight basic assumptions of Minimum Deterrence against available evidence In general Minimum Deterrence does not fare well under the careful scrutiny Proponents of a Minimum Deterrent US nuclear force posture believe that anywhere from a handful to a few hundred nuclear weapons are adequate to deter reliably and predictably any enemy from attacking the United States now and in the future Because nuclear weapons are so destructive their thinking goes no foreign leader would dare challenge US capabilities The benefits advocates claim of reducing US nuclear weapons to the minimum level needed are better relations with Russia and China reinforcement of the arms control and Nonproliferation Treaty billions of defense dollars in savings and greater international stability on the way to nuclear zero As political pressure builds to pursue this vision of minimum US deterrence Minimum Deterrence Examining the Evidence stands as the seminal study to address the many claims of great benefit using available evidence This book was published as a special issue of Comparative Strategy

with the United States and its neighbors China was the driving factor in the new strategy the United States announced in 2012 that called for a rebalance of U S forces to the Asia Pacific region At the same time China s actions on its borders in the East China Sea and in the South China Sea have shown that it is steadily expanding its geopolitical role in the Pacific and having a steadily increasing impact on the strategy and military developments in other Asian powers The American Edge Seth G. Jones,2025-11-03 In The American Edge Seth G Jones explains how the industrial bases of the world s great military powers have risen and fallen over the past century and what it means for America Today the US s military base lacks the capacity and flexibility necessary to deter China s growing military power but the country s private sector is flourishing with companies including SpaceX Microsoft and Anduril exhibiting tremendous innovation To regain its capacity to effectively deter China and retain its unmatched status the US must deepen its partnerships with the nation s most innovative tech companies *Department of Defense's Role in Combating Terrorism and Force Protection Lessons Learned Since the Attack on the U.S.S. Mazanec,2015

Former secretary of defense Leon Panetta once described cyber warfare as the most serious threat in the twenty first century capable of destroying our entire infrastructure and crippling the nation Already major cyber attacks have affected countries around the world Estonia in 2007 Georgia in 2008 Iran in 2010 and most recently the United States As with other methods of war cyber technology can be used not only against military forces and facilities but also against civilian targets Information technology has enabled a new method of warfare that is proving extremely difficult to combat let alone defeat And yet cyber warfare is still in its infancy with innumerable possibilities and contingencies for how such conflicts may play out in the coming decades Brian M Mazanec examines the worldwide development of constraining norms for cyber war and predicts how those norms will unfold in the future Employing case studies of other emerging technology weapons chemical and biological strategic bombing and nuclear weaponry Mazanec expands previous understandings of norm evolution theory offering recommendations for U S policymakers and citizens alike as they grapple with the reality of cyber terrorism in our own backyard

Phantom Menace or Looming Danger? Kathleen M. Vogel, 2012-11-09 The horrifying terrorist attacks on September 11 2001 and the anthrax strikes that soon followed gave the United States new reason to fear unconventional enemies and atypical weapons These fears have prompted extensive research study and planning within the U S military intelligence and policy communities regarding potential attacks involving biological weapons In *Phantom Menace or Looming Danger* Kathleen M Vogel argues for a major shift in how analysts assess bioweapons threats She calls for an increased focus on the social and political context in which technological threats are developed Vogel uses case studies to illustrate her theory Soviet anthrax weapons development the Iraqi mobile bioweapons labs and two synthetic genomic experiments She concludes with recommendations for analysts and policymakers to integrate sociopolitical analysis with data analysis thereby making U S bioweapon assessments more accurate Students of security policy will find her innovative framework appealing her writing style accessible and the many illustrations helpful These features also make *Phantom Menace or Looming Danger* a must read for government policymakers and intelligence experts Lynn Eden Center for International Security and Cooperation Freeman Spogli Institute for International Studies Stanford University

and continued Iranian efforts to undercut the spread of democracy in the region Under the Nuclear Shadow Fiona S. Cunningham, 2025-01-07 How and why China has pursued information age weapons to gain leverage against its adversaries How can states use military force to achieve their political aims without triggering a catastrophic nuclear war Among the states facing this dilemma of fighting limited wars only China has given information age weapons such a prominent role While other countries have preferred the traditional options of threatening to use nuclear weapons or fielding capabilities for decisive conventional military victories China has instead chosen to rely on offensive cyber operations counterspace capabilities and precision conventional missiles to coerce its adversaries In Under the Nuclear Shadow Fiona Cunningham examines this distinctive aspect of China's post Cold War deterrence strategy developing an original theory of strategic substitution When crises with the United States highlighted the inadequacy of China's existing military capabilities Cunningham argues China pursued information age weapons that promised to rapidly provide credible leverage against adversaries Drawing on hundreds of original Chinese language sources and interviews with security experts in China Cunningham provides a rare and candid glimpse from Beijing into the information age technologies that are reshaping how states gain leverage in the twenty first century She offers unprecedented insights into the trajectory of China's military modernization as she details the strengths and weaknesses of China's strategic substitution approach Under the Nuclear Shadow also looks ahead at the uncertain future of China's strategic substitution approach and briefly explores too how other states might seize upon the promise of emerging technologies to address weaknesses in their own military strategies
