

MX-2002(E)

Agent Release Control Panel

MINIMAX

General

The MX-2002 is a advanced RACP for single and dual handed agent releasing applications. The MX-2002 provides reliable fire detection, signaling and protection for commercial, industrial and institutional buildings requiring agent-based releasing. The MX-2002 is compatible with System Sensor's [®] detectors which are conventional smoke detectors that can transmit a maintenance trouble signal to the RACP indicating the need for cleaning and a supervisory "break" signal when the ambient temperature falls below the detector rating of approximately 55°F (7.22°C). In addition, the controller is compatible with conventional input devices such as: dry-wire smoke detectors, dry-wire smoke detectors, pull stations, waterflow devices, tamper switches and other normally-open contact devices. Refer to the Minimax Device Compatibility Document for a complete listing of compatible devices.

Four outputs are programmable as RAC's identification, appliance, de-alar or releasing output. These programmable RAC's output relays are programmed for Alarm, Trouble and Supervisory and 24 VDC special application (resistor and non-resistor) power outputs are also included on the main circuit board. The MX-2002 supervises all wiring, AC voltage, battery charger and battery level.

Activation of a compatible smoke detector or any normally-open fire alarm initiating device will activate audible and visual signaling devices. Minimize an indication, display alarm information on the panel's LCD, sound the alarm siren at the RACP activate the RACP alarm relay and operate an optional module (add-on) to notify a remote station or initiate an auxiliary communication.

The E offers the same features as the MX-2002 but allows connection to 24VDC-40 VAC. Unless otherwise specified, the information in this data sheet applies to both the 120VAC and 240VAC RAC versions of the panel.
