Advances in Experimental Political Philosophy Matthew Lindauer,2023-09-21 Political philosophy asks questions of great importance to our lives both as individuals and members of political communities What is justice What does the state owe to its citizens Under which conditions are different forms of government likely to be stable The relevance of empirical research to such questions however has been largely underexplored Introducing experimental political philosophy as a burgeoning field of inquiry this volume brings together leading scholars using empirical methods to shed light on questions of justice and politics and encourages them to reflect on the relationship of their methodologies to less empirically focused approaches Chapters cover traditional topics including distributive justice egalitarianism property rights and healthcare justice as well as outlining new directions and applications such as the problem of misogynistic extremist movements the public justification of immigration enforcement and the relationship between gender norms and support for care labor organizing The result is a unique collection that paves the way for further debates in the field and meaningful reflection on what it means for political philosophy to be empirically informed

Research Methodology Herman Aguinis,2024-02-20 Herman Aguinis s Research Methodology provides a comprehensive guide to conducting high impact empirical research A valuable resource for all researchers it offers step by step explanations of diverse methodologies with practical guidelines This text aids readers in selecting compelling topics reporting results and evaluating published research

Preparing for Life in a Digital Age Julian Fraillon,John Ainley,Wolfram Schulz,Tim Friedman,Eveline Gebhardt,2014-12-13 Ability to use information and communication technologies ICT is an imperative for effective participation in today s digital age Schools worldwide are responding to the need to provide young people with that ability But how effective are they in this regard The IEA International Computer and Information Literacy Study ICILS responded to this question by studying the extent to which young people have developed computer and information literacy CIL which is defined as the ability to use computers to investigate create and communicate with others at home school the workplace and in society The study was conducted under the auspices of the International Association for the Evaluation of Educational Achievement IEA and builds on a series of earlier IEA studies focusing on ICT in education Data were gathered from almost 60 000 Grade 8 students in more than 3 300 schools from 21 education systems This information was augmented by data from almost 35 000 teachers in those schools and by contextual data collected from school ICT coordinators school principals and the ICILS national research centers The

IEA ICILS team systematically investigated differences among the participating countries in students CIL outcomes how participating countries were providing CIL related education and how confident teachers were in using ICT in their pedagogical practice The team also explored differences within and across countries with respect to relationships between CIL education outcomes and student characteristics and school contexts In general the study findings presented in this international report challenge the notion of young people as digital natives with a self developed capacity to use digital technology The large variations in CIL proficiency within and across the ICILS countries suggest it is naive to expect young people to develop CIL in the absence of coherent learning programs Findings also indicate that system and school level planning needs to focus on increasing teacher expertise in using ICT for pedagogical purposes if such programs are to have the desired effect The report furthermore presents an empirically derived scale and description of CIL learning that educational stakeholders can reference when deliberating about CIL education and use to monitor change in CIL over time
