American Invasions Canada to Afghanistan 1775 to 2010 is a thought provoking analysis of the reasons for American invasions and warmongering over the last two centuries Contrary to the views expressed by the Western media and Western historians the American Empire is not a force for the promotion of free thinking and democracy but instead a force for imperial conquests and imposed dictatorships through the use of a military industrial complex fed by the American Empire outspending the rest of the world combined on weapons of mass destruction The American Empire has used and will continue to use the most sophisticated weapons from nuclear bombs to bunker busting bombs to land mines to chemical and biological weapons on defenseless men women and children to feed its insatiable appetite for warmongering and imperial expansion It combines military bases around the world with military prisons used for torture and extraction of information Its navy patrols every corner of the globe and its planes can rain down bombs from the heavens on every civilian on the planet **The**

Imperial Nation Josep M. Fradera,2021-06-08 How the legacy of monarchical empires shaped Britain France Spain and the United States as they became liberal entities Historians view the late eighteenth and early nineteenth centuries as a turning point when imperial monarchies collapsed and modern nations emerged Treating this pivotal moment as a bridge rather than a break The Imperial Nation offers a sweeping examination of four of these modern powers Great Britain France Spain and the United States and asks how after the great revolutionary cycle in Europe and America the history of monarchical empires shaped these new nations Josep Fradera explores this transition paying particular attention to the relations between imperial centers and their sovereign territories and the constant and changing distinctions placed between citizens and subjects Fradera argues that the essential struggle that lasted from the Seven Years War to the twentieth century was over the governance of dispersed and varied peoples each empire tried to ensure domination through subordinate representation or by denying any representation at all The most common approach echoed Napoleon s special laws which allowed France to reinstate slavery in its Caribbean possessions The Spanish and Portuguese constitutions adopted specialness in the 1830s the United States used comparable guidelines to distinguish between states territories and Indian reservations and the British similarly ruled their dominions and colonies In all these empires the mix of indigenous peoples European origin populations slaves and indentured workers immigrants and unassimilated social groups led to unequal and hierarchical political relations Fradera considers not only political and constitutional transformations but also their social underpinnings Presenting a fresh perspective on the ways in which nations descended and evolved from and throughout empires The Imperial Nation highlights the ramifications of this entangled history for the subjects who lived in its shadows Proceedings of the Annual
