, Tax Law, State-Building and the Constitution Dominic de Cogan, 2020-08-06. This monograph looks at how tax is intertwined with constitutional law and the state in the UK. It looks at a variety of topics including tax devolution, scrutiny and reform of tax legislation, the protection of taxpayers, and the domestic legal processing of international rules and problems. *Tax Law, State Building and the Constitution* presents and interrogates five key claims. First, there is a clear overlap between the concerns of tax and constitutional lawyers. Secondly, the tax system is being deeply affected by the fast pace of constitutional change. Thirdly, decisions taken in the tax field are likely to have a reverse influence on the evolution of the constitution. Fourthly, these relationships are heavily context-dependent, with tax making all the difference to some ongoing constitutional controversies whilst having very little to do with others. Fifthly, by acknowledging tax as an important moving part within the contemporary constitution, we might understand both tax and constitutional law a little better. The book therefore contributes to deeper theoretical debates on the identity of tax law as a discipline, the relevance of tax to public lawyers, the meaning of state building in the recent history of a developed country, and the importance of public finances to a wider sense of what is going on. These are questions that ought to command the attention of tax and constitutional law academics as well as policy makers and reformers. Runner up of the 2022 SLS Peter Birks Prize for Outstanding Legal Scholarship.

*Optimal Redistributive Taxation* Matti Tuomala, 2016. Tax systems raise large amounts of revenue for funding public sector activities, and tax transfer policy together with public provision of

education health care and social services play a crucial role in treating the symptoms and the causes of poverty The normative analysis is crucial for tax transfer design because it makes it possible to assess separately how changes in the redistributive criterion of the government and changes in the size of the behavioural responses to taxes and transfers affect the optimal tax transfer system Optimal tax theory provides a way of thinking rigorously about these trade offs Written primarily for graduate students and researchers this volume is intended as a textbook and research monograph connecting optimal tax theory to tax policy It comments on some policy recommendations of the Mirrlees Review and builds on the authors work on public economics optimal tax theory behavioural public economics and income inequality The book explains in depth the Mirrlees model and presents various extensions of it The first set of extensions considers changing the preferences for consumption and work behavioural economic modifications such as positional externalities prospect theory paternalism myopic behaviour and habit formation but also heterogeneous work preferences besides differences in earnings ability The second set of modifications concerns the objective of the government The book explains the differences in optimal redistributive tax systems when governments instead of maximising social welfare minimise poverty or maximise social welfare based on rank order or charitable conservatism social welfare functions The third set of extensions considers extending the Mirrlees income tax framework to allow for differential commodity taxes capital income taxation public goods provision public provision of private goods and taxation commodities that generate externalities The fourth set of extensions considers incorporating a number of important real word extensions such as tagging of tax schedules to certain groups of tax payers In all extensions the book illustrates the main mechanisms using advanced numerical simulations

[The Dark Side of Modernity](#) Jeffrey C. Alexander, 2013-04-25 In this book one of the world's leading social theorists presents a critical alarmed but also nuanced understanding of the post traditional world we inhabit today Jeffrey Alexander writes about modernity as historical time and social condition but also as ideology and utopia The idea of modernity embodies the Enlightenment's noble hopes for progress and rationality but its reality brings great suffering and exposes the destructive impulses that continue to motivate humankind Alexander examines how twentieth century theorists struggled to comprehend the Janus faced character of modernity which looks backward and forward at the same time Weber linked the triumph of worldly asceticism to liberating autonomy but also ruthless domination describing flights from rationalization as systemic and dangerous Simmel pointed to the otherness haunting modernity even as he normalized the stranger Eisenstadt celebrated Axial Age transcendence but acknowledged its increasing capacity for barbarity Parsons heralded American community but ignored modernity's fragmentations Rather than seeking to resolve modernity's contradictions Alexander argues that social theory should accept its Janus faced character It is a dangerous delusion to think that modernity can eliminate evil Civil inclusion and anti civil exclusion are intertwined Alexander enumerates dangerous frictions endemic to modernity but he also suggests new lines of social amelioration and emotional repair

How Are You Going to Pay for That? Ryan Cooper,2025-09-23 A compelling alternative view of the relationship between our politics and our economy Throughout America structural problems are getting worse Economic inequality is near Gilded Age heights the healthcare system is a mess and the climate crisis continues to grow Yet most ambitious policy proposals that might fix these calamities are dismissed as wastefully expensive by default From the kitchen table to Congress debates are punctuated with a familiar refrain How are you going to pay for that This question is designed to shut down policy pushes up front minimizing any interference with the free market It comes from neoliberalism an economic ideology that has overtaken both parties Proponents insist that markets are naturally occurring and apolitical and that too much manipulation of the economy will make our society fall apart Ryan Cooper argues that our society already is falling apart and the logically preposterous views of neoliberalism are to blame Most progressives understand this instinctively but many lack the background knowledge to make effective economic counterarguments How Are You Going To Pay For That is filled with engaging discussions and detailed strategies that policymakers and citizens alike can use to assail even the most entrenched lines of neoliberal logic and start to undo these long held misconceptions Equal parts economic theory history and political polemic this is an essential roadmap for winning the key battles to come      **Fundamentals of Health Care Financial**
