

## Chapter 1 – Introduction to Statistics

1. What is the level of measurement for each of the following variable?

- |  |          |
|--|----------|
| a. Student IQ ratings.                                 | Interval |
| b. Distances students travel to class.                 | Ratio    |
| c. Student scores on the on the first Statistics test. | Ratio    |
| d. A classification of students by province of birth.  | Nominal  |
| e. A ranking of students by letter grades.             | Ordinal  |
| f. Number of hours students study per week.            | Ratio    |
| g. The political parties in Canada.                    | Nominal  |
| h. Team standings in the National Hockey League.       | Ordinal  |
| i. Jersey numbers in basketball.                       | Nominal  |
| j. The number of car sales in the last six months.     | Ratio    |

2. For the following variables, classify each as discrete or continuous, qualitative or quantitative and determine the level of measurement:

- |                                 |                                    |
|---------------------------------|------------------------------------|
| a. Salary.                      | Continuous, Quantitative, Ratio    |
| b. Gender.                      | Discrete, Qualitative, Nominal     |
| c. Sales volume of MP3 players. | Discrete, Quantitative, Ratio      |
| d. Soft drink preference.       | Discrete, Qualitative, Nominal     |
| e. Temperature.                 | Continuous, Quantitative, Interval |
| f. GPA score.                   | Continuous, Quantitative, Interval |
| g. Student rank in class.       | Discrete, Qualitative, Ordinal     |
| h. Rating of a new movie.       | Discrete, Qualitative, Ordinal     |
| i. Number of home computers.    | Discrete, Quantitative, Ratio      |

3. What is the level of measurement reflected by the following data:

- a. The ages of the persons in a sample of 50 adults who listen to one of the Oldies radio stations in Canada are as follows:

35	29	41	34	44	46	42	42	37	47
30	33	45	56	44	39	43	43	44	40
47	34	41	27	33	33	39	38	43	22
44	40	35	35	41	42	37	42	38	43

## **Answer Key For Stats Data Models:**

Automatic Item Generation Mark J. Gierl, Thomas M. Haladyna, 2013 Automatic item generation AIG represents a relatively new and unique research area where specific cognitive and psychometric theories are applied to test construction practices for the purpose of producing test items using technology The purpose of this book is to bring researchers and practitioners up to date on the growing body of research on AIG by organizing in one volume what is currently known about this research area Part I begins with an overview of the concepts and topics necessary for understanding AIG by focusing on both its history and current applications Part II presents two theoretical frameworks and practical applications of these frameworks in the production of item generation Part III summarizes the psychological and substantive characteristics of generated items Part IV concludes with a discussion of the statistical models that can be used to estimate the item characteristics of generated items features one future application of AIG describes the current technologies used for AIG and also highlights the unresolved issues that must be addressed as AIG continues to mature as a research area Comprehensive The book provides a comprehensive analysis of both the theoretical concepts that define automatic item generation and the practical considerations required to implement these concepts Varied Applications Readers are provided with novel applications in diverse content areas e g science and reading comprehension that range across all educational levels elementary through university

**Introduction to Machine Learning** Aditya Tandon, Nagesh Salimath, Dr. Surbhi Bhatia, Kamalakanta Sethi, Bata Krishna Tripathy, 2019-11-28 Machine learning is one of the fastest growing areas of computer science with far reaching applications The aim of this textbook is to introduce machine learning and the algorithmic paradigms it offers in a principled way The book provides an extensive theoretical account of the fundamental ideas underlying machine learning and the mathematical derivations that transform these principles into practical algorithms Following a presentation of the basics of the field the book covers a wide array of central topics that have not been addressed by previous textbooks These include a discussion of the computational complexity of learning and the concepts of convexity and stability important algorithmic paradigms including stochastic gradient descent neural networks and structured output learning and emerging theoretical concepts such as the PAC Bayes approach and compression based bounds Designed for an advanced undergraduate or beginning graduate course the text makes the fundamentals and algorithms of machine learning accessible to students and nonexpert readers in statistics computer science mathematics and engineering

**Latent Variable Modeling with R** W. Holmes Finch, Brian F. French, 2015-06-26 This book demonstrates how to conduct latent variable modeling LVM in R by highlighting the features of each model their specialized uses examples sample code and output and an interpretation of the results Each chapter features a detailed example including the analysis of the data using R the relevant theory the assumptions underlying the model and other statistical details to help readers better understand the models and interpret the results Every R command necessary for conducting the analyses is described along with the resulting output which provides readers with a template to follow when they apply the methods to their own data The basic information pertinent to each model the newest developments in these areas and the relevant R code to use them are reviewed Each chapter also features an introduction summary and suggested readings A glossary of the text s boldfaced key terms and key R commands serve as helpful resources The book is accompanied by a website with exercises an answer key and the in text example data sets Latent Variable Modeling with R Provides some examples that use messy data providing a more realistic situation readers will encounter with their own data Reviews a wide range of LVMs including factor analysis structural equation modeling item response theory and mixture models and advanced topics such as fitting nonlinear structural equation models nonparametric item response theory models and mixture regression models Demonstrates how data simulation can help researchers better understand statistical methods and assist in selecting the necessary sample size prior to collecting data [www.routledge.com/9780415832458](http://www.routledge.com/9780415832458) provides exercises that apply the models along with annotated R output answer keys and the data that corresponds to the in text examples so readers can replicate the results and check their work The book opens with basic instructions in how to use R to read data download functions and conduct basic analyses From there each chapter is dedicated to a different latent variable model including exploratory and confirmatory factor analysis CFA structural equation modeling SEM multiple groups CFA

SEM least squares estimation growth curve models mixture models item response theory both dichotomous and polytomous items differential item functioning DIF and correspondance analysis The book concludes with a discussion of how data simulation can be used to better understand the workings of a statistical method and assist researchers in deciding on the necessary sample size prior to collecting data A mixture of independently developed R code along with available libraries for simulating latent models in R are provided so readers can use these simulations to analyze data using the methods introduced in the previous chapters Intended for use in graduate or advanced undergraduate courses in latent variable modeling factor analysis structural equation modeling item response theory measurement or multivariate statistics taught in psychology education human development and social and health sciences researchers in these fields also appreciate this book s practical approach The book provides sufficient conceptual background information to serve as a standalone text Familiarity with basic statistical concepts is assumed but basic knowledge of R is not
