speaking for themselves. This highly practical book provides parents insights into how Gen Z thinks the ways their brains learn and illustrates why children of this technological generation believe and act the ways they do. There are some red flags in American culture and smart technology and digital devices are right there at the center of them all. Students in Gen Z do not recall a time before the Internet and smart technology. As a result serious issues are arising in American culture within Gen Z. These considerations have implications for families and interpersonal relationships and will also impact future economics as more and more students from Gen Z graduate college and enter the workforce. Parents will find this book compelling and will be challenged to consider whether their withdrawn ear-budded children are addicted to their devices and social media and to where all of this might lead.
