The Ascent of Man James F. Harris, 2017-09-29 The Ascent of Man develops a comprehensive theory of human nature James F Harris sees human nature as an emergent property that supervenes a cluster of properties Despite significant overlap between individuals that have human nature and those that are biologically human the concept of human nature developed in this book is different Whether biologically human or not an individual may be said to possess human nature This theory of human nature is called the cluster theory Harris takes as his point of departure Plato s comment that in learning

Tyner,2023-08-21

There are many how to books on writing for academics none of these however relate specifically to the discipline of geography In this book the author identifies the principle modes of academic writing that graduate students and early career faculty will encounter specifically focusing on those forms expected of geographers that is those modes that are reviewed by academic peers This book is readily accessible to senior undergraduate and graduate students and early career faculty who may feel intimidated by the process of writing This volume is not strictly a how to or step by step manual for writing an article or book rather through the use of real concrete examples from published and unpublished works the author de mystifies the process of different types of scholarly pieces geographers have to write with the specific needs and challenges of the discipline in mind Although chapters are thematic based e g stand alone chapters on book reviews articles and books the manuscript is structured around the concept of story telling for it is the author s contention that all writing whether a scientific study or more humanist essay is a form of story telling Masters of the Grotesque Schuy R. Weishaar,2012-10-26 The concepts and theories surrounding the aesthetic category of the grotesque are explored in this book by pursuing their employment in the films of American auteurs Tim Burton Terry Gilliam the Coen Brothers and David Lynch The author argues that interpreting these directors films through the lens of the grotesque allows us1to situate both the auteurs and the films within a long history of the grotesque in art and aesthetics This cultural tradition effectively subsumes the contribution of any artist or1genre that intersects it but also affords the artist or genre the auteur and the genre filmmaker a pantheon and an abundance of images themes and motifs through which he1or she can subversively represent the world and our place in it
