Reese, 2023-12-12 Discover a groundbreaking new way of thinking about life, society, and the future of our species that bridges science and human history. Could humans unknowingly be a part of a larger superorganism, one with its own motivations and goals, one that is alive and conscious and has the power to shape the future of our species? This is the fascinating theory from author and futurist Byron Reese, who calls this human superorganism *Agora*. In *We Are Agora*, Reese starts by asking the question: What is life, and how did it form? From there, he looks at how multicellular life came about, how consciousness emerged, and how other superorganisms in nature have formed. Then he poses eight big questions based on the *Agora* theory, including: If ants have colonies, bees have hives, and we have our bodies, how does *Agora* manifest itself? Does it have a body? Can *Agora* explain things that happen that are both under our control and near universally undesirable, such as war? How can *Agora* theory explain long-term progress we've made in the world? In this unique and ambitious work that spans all of human history and looks boldly into its future, Reese melds science and history to look at the human species from a fresh new perspective. Told with his characteristic wit and compulsive readability, *We Are Agora* will give readers a better understanding of where we've been, where we're going, and how our fates are intertwined. Star Trek: Discovery:

She gets her chance when the *Shenzhou* must protect a Federation colony that is under attack by an ancient alien vessel that has surfaced from the deepest fathoms of the planet's dark, uncharted sea. As the menace from this mysterious vessel grows stronger, Starfleet declares the colony expendable in the name of halting the threat. To save thousands of innocent lives, Burnham must infiltrate the alien ship. But to do so, she needs to face the truth of her troubled past and seek the aid of a man she has tried to avoid her entire life until now. **Educational Media and Technology Yearbook** Michael Orey, Stephanie A. The science is nothing short of sorcery as an extra terrestrial humanoid named John Jay Corsey gives mankind a dimensional  
boost from Einsteins quantum theory for the love of a twenty year old stripper With science heretofore unknown to humans  
but which was found to be related to the alien spacecraft that crash landed near Roswell New Mexico Corsey becomes the  
center of a massive project to build the first faster than light starship to take flight into universa incognita searching for two  
unearthly elements but quickly more than rocks are found by the newly minted Space Marine Corps Corsey found mankind  
specifically the U S government unprepared but willing to build the machine They jumped right in to the project with the  
verve and gusto typical of modern man cobbling together human and extra terrestrial science to make it a shining reality On  
a fenced in 200 sq mile swath of Arizona New Mexico desert Sol Base One is built The nascent masters of the deep wide and  
dark universal empyrean the Space Marines Corps recruits the best minds and bodies to man the Terrain Explorer the first  
starship in human history The rush to build it becomes a race as world politics views it as an unwise decision and prepares to  
stymie the ships launch after the Space Marines crafty commandant refuses to reveals the program and its intentions The  
next decision made is to launch the mission 425 men on board the Terrain Explorer before the U N could send in inspection  
teams And thus the fate of humanitys first venture into the stars is sealed Join Capt Jackson Edison Jed Devlon and the crew  
of the Terrain Explorer in what promises to be a thrilling masterful exploration of the possibilities of time and space Will they  
land on earth like worlds such as humanity knows therefore solidifying the fact of infinite replication in the universe Who  
amongst the extra terrestrial races will they meet and who will be their friend or enemy How will they survive The  
permutations grip readers with excitement The writing is riveting in detail and shines with crystal clear believability The  
future is at stake      Endless Earth Vorzsak Milan, What is the purpose of evolution Why is velocity in the Universe limited to  
the speed of light She is an elf from before the evolution of mankind plunged into the year 2456 She claims to be the one who  
aided Father Earth in the design of all species of life on Earth But her Parent has now sent her to the time of the ending of  
the world which she swears to prevent In her original life before the Ice Age she struggles with Black the leader of a tribe of  
primitive Homo sapiens She despises him for his rough nature but she eventually understands that it is her duty to get him  
started on the bumpy road to evolution In her present the intelligent races of the galaxy are pooling knowledge through the  
Archives a galactic network of alien transmissions to break the lightspeed barrier and finally open up the galaxy But what is  
needed to make the Earth endless This novel is a unique fantastic theory on the history of evolution based on hard historic  
facts blended with fun fantasy It also probes the future possibilities of mankind as well as the laws of physics that govern the  
Universe which humankind needs to see as a challenge in order to conquer the stars It is a standalone story but also the first  
part of a trilogy whose next volumes will also be published in the near future The second volume *Endless Mars* details the

struggles of a long ago Martian race to escape their dying planet while the third instalment entitled Endless Space rounds up the story of all the intelligent races of the galaxy
