## YAMAHA WaveRunner®

All riders must wear an approved personal flotation device (PPD) that is suitable for personal watercraft use. Severe personal injuries can occur if water is forced into body cavities (such as the rectum or vagina) as a result of falling into the water or being near the jet thrust nozzle. All riders must wear a well-fitted helmet or clothing that provides equivalent protection (see the owner's manual).

Attach the engine shut-off cord (lanyard) to your left wrist and keep it free from the handlebars so that the engine stops if you, the operator, fall off. The engine will not start when the clip is removed from the engine shut-off switch. After riding, remove the engine shut-off cord (lanyard) from the watercraft to avoid serious fire starting or unauthorized use by children or others.

Squeeze the throttle lever to increase engine speed. Release the throttle lever to decrease engine speed or to return it to the idle position. Always check the throttle and steering controls for proper operation before starting the engine.

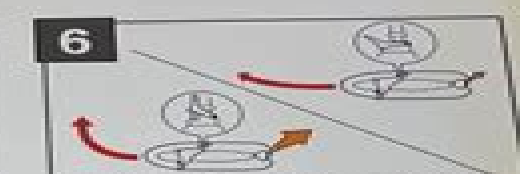

## Riding Instructions

Ventilate the engine compartment before each use. Do not start the engine if there is a fuel leak or a loose electrical connection.

Push the start switch (green button) to start the engine. Push the engine stop switch (red button) to stop the engine.

Steering control depends on the combination of handlebar position and the amount of throttle. The amount of jet thrust, in addition to the position of the handlebars, determines how sharply you turn. Do not release the throttle lever when trying to steer away from objects - you need throttle to steer.
