analysis tools with meticulous attention paid to definitions and terminology This book presents the adopted technologies and their manufacturers in detail making WSNs tangible for the reader In introductory computer networking books chapter sequencing follows the bottom up or top down architecture of the 7 layer protocol This book addresses subsequent steps in this process both horizontally and vertically thus fostering a clearer and deeper understanding through chapters that elaborate on WSN concepts and issues With such depth this book is intended for a wide audience it is meant to be a helper and motivator for senior undergraduates postgraduates researchers and practitioners It lays out important concepts and WSN related applications uses appropriate literature to back research and practical issues and focuses on new trends Senior undergraduate students can use it to familiarize themselves with conceptual foundations and practical project implementations For graduate students and researchers test beds and simulators provide vital insights into analysis methods and tools for WSNs Lastly in addition to applications and deployment practitioners will be able to learn more about WSN manufacturers and components within several platforms and test beds

**Link-Layer Cooperative Communication in Vehicular Networks** Sailesh Bharati, Weihua Zhuang, 2017-07-25 This book presents link layer cooperative frameworks to improve transmission reliability and network throughput of distributed TDMA MAC protocols in vehicular ad hoc networks VANETs The main objective of this book is to present link layer node cooperation schemes to enhance the link layer performance of vehicular networks in terms of reliability and system throughput The authors present approaches proposed for the medium access control MAC and node cooperation in VANETs The authors also cover cooperative ADHOC MAC for point to point communication between a pair of source and destination nodes and cooperative relay broadcasting for broadcast services in this book The performance of node cooperation frameworks is evaluated via mathematical analysis and computer simulations in comparison with distributed TDMA MAC protocols without cooperation The proposed node cooperation frameworks enhance the performance of distributed TDMA MAC and make it more robust to tackle the dynamic networking conditions in VANETs Furthermore with cooperation enabled transmission the performance of distributed TDMA MAC is more suitable to support the wide range of mobile applications and their strict service requirements which is discussed in this book The proposed node cooperation schemes and distributed cooperation decisions can be extended to wireless systems other than distributed TDMA MAC such as cellular communication for vehicular communications introduced in this book This book is useful for researchers from academia and industry as well as advanced level students interested in vehicular communication networks It is also useful for professionals and engineers developing applications that use cooperative wireless communication systems

**The University** Henry Rosovsky, 2014-11-24 Superb Rosovsky has written an important book probing wise shrewd fair Deserves to be widely read James O Freeman Washington Post A view of America's colleges and universities and how they are run the challenges they face and the issues that affect their owners students faculty alumni trustees and others Among the issues covered are tenure the admission process in elite institutions

and curriculum      Advances in Hydroinformatics Philippe Gourbesville, Guy Caignaert, 2020-07-25 This book features a collection of extended papers based on presentations given at the SimHydro 2019 conference held in Sophia Antipolis in June 2019 with the support of French Hydrotechnic Society SHF focusing on Which models for extreme situations and crisis management Hydraulics and related disciplines are frequently applied in extreme situations that need to be understood accurately before implementing actions and defining appropriate mitigation measures However in such situations currently used models may be partly irrelevant due to factors like the new physical phenomena involved the scale of the processes and the hypothesis included in the different numerical tools The availability of computational resources and new capacities like GPU offers modellers the opportunity to explore various approaches to provide information for decision makers At the same time the topic of crisis management has sparked interest from stakeholders who need to share a common understanding of a situation Hydroinformatics tools can provide essential information in crises however the design and integration of models in decision support systems require further development and the engagement of various communities such as first responders In this context methodologies guidelines and standards are more and more in demand in order to ensure that the systems developed are efficient and sustainable Exploring both the limitations and performance of current models this book presents the latest developments based on new numerical schemes high performance computing multiphysics and multiscale methods as well as better integration of field scale model data As such it will appeal to practitioners stakeholders researchers and engineers active in this field      *Mobile Ad Hoc Networks* Jonathan Loo, Jaime Lloret Mauri, Jesús Hamilton Ortiz, 2016-04-19 Guiding readers through the basics of these rapidly emerging networks to more advanced concepts and future expectations this book examines the most pressing research issues in Mobile Ad hoc Networks MANETs Leading researchers industry professionals and academics provide an authoritative perspective of the state of the art in MANETs The book includes surveys of recent publications that investigate key areas of interest such as limited resources and the mobility of mobile nodes It considers routing multicast energy security channel assignment and ensuring quality of service      On Flinching Tiffany Watt Smith, 2014-05-22 While the end of the nineteenth century is often associated with the rise of objectivity and its ideal of a restrained observer scientific experiments continued to create emotional even theatrical relationships between scientist and his subject On Flinching focuses on moments in which scientific observers flinched from sudden noises winced at the sight of an animal's pain or cringed when he was caught looking as ways to consider a distinctive motif of passionate and gestured looking in the laboratory and beyond It was not their laboratory machines but these scientific observers most closely resembled but the self consciously emotional theatrical audiences of the period Tiffany Watt Smith offers close readings of four experiments performed by the naturalist Charles Darwin the physiologist David Ferrier the neurologist Henry Head and the psychologist Arthur Hurst Bringing together flinching scientific observers with actors and spectators in the late nineteenth and early twentieth century theatre it places the history of scientific looking in its wider cultural context

arguing that even at the dawn of objectivity the techniques and problems of the stage continued to haunt scientific life In turn it suggests that by exploring the ways recoiling shrinking and wincing becoming paradigmatic spectatorial gestures in this period we can understand the ways Victorians thought about looking as itself an emotional and gestured performance
