Kevin D. Finson, Jon Pedersen, 2015-03-01 This book examines visual data use with students PK 16 as well as in pre service in service science teacher preparation Each chapter includes discussion about the current state of the art with respect to science classroom application and utilization of the particular visual data targeted by the author s discussion and explanation about the targeted visual data as applied by the author in his her classroom use of visual data as a diagnostic tool its use as an assessment tool and discussion of implications for science teaching and or science teacher preparation Although the body of research and practice in this field is growing there remains a gap in the literature about clearly explicating the use of visual data in the science classroom A growing body of literature discusses what visual data are although this topic is still

viewed as being at the beginning of its development in educators thinking and there are some scattered examples of studies exploring the use of visual data in science classrooms although those studies have not necessarily clearly identified their foci as visual data per se As interest and attention has become more focused on visual data a logical progression of questioning has been how visual data are actually applied in the science classroom whether it be early elementary college or somewhere in between Visual data applications of interest to the science education community include how it is identified how it can be used with students and how students can generate it themselves how it can be employed as a diagnostic tool in concept development and how it can be utilized as an assessment tool This book explores that as well as a variety of pragmatic ways to help science educators more effectively utilize visual data and representations in their instruction **Teaching Early**

Years Mathematics, Science and ICT Annette Hilton,2020-07-22 When young children first arrive at school they generally know how to use a mobile phone and a tablet and how to count share and measure They have a sense of wonder about the world around them They expect to further interact with technology and to build and extend their mathematics and science knowledge Teaching Early Years Mathematics Science and ICT shows how teachers of children in their first three years of formal schooling can guide students in developing a sound understanding of the key concepts in mathematics and science in classroom and field activities It shows how to select appropriate educational technology and effectively and routinely integrate it into the learning experience as part of students wider classroom learning Throughout the authors make connections between children s out of school and in school experiences as well as connections across key learning areas They provide real classroom examples of learning experiences which can be adapted for different year levels A reflection template assists teachers in planning and successfully implementing teaching strategies to meet curriculum requirements Teaching Early Years Mathematics Science and ICT helps teachers bridge theory and practice in teaching children aged 5 to 8 years
