Maths Mastery Reasoning: Photocopiable Resources KS1 John Bee, 2020-07-23 Maths Mastery Reasoning Teacher Resources KS1 contains a wealth of practical ideas and photocopiable resources to promote reasoning using precise mathematical vocabulary and stem sentences. It will enable teachers to explicitly teach children how to reason so they can answer questions such as Which skills do I need to complete the task? How can I explain my thinking? What vocabulary do I need to use? Covering all areas of the primary maths curriculum including place value, fractions and the four operations, each photocopiable activity enables pupils to practise key skills and make links to the maths they are using. Many of the activities can be completed using a concrete, pictorial and abstract CPA approach to teaching maths. Written by experienced teacher John Bee, this must-have resource is ideal for teachers just starting on the maths mastery journey or for more experienced teachers who need some fresh input and ideas. This unique book will engage pupils in lively debate when they hypothesise, agree, criticise and prove their learning around key mathematical concepts. A companion book for Key Stage 2 is also available. Please note that the PDF eBook version of this book cannot be printed or saved in any other format. It is intended for use on interactive whiteboards and projectors only.

Developing Early Maths Skills Outdoors Marianne Sargent, 2020-01-09 *Developing Early Maths Skills Outdoors* provides practitioners with practical planning for how to develop and enhance the outdoor area to facilitate mathematical learning. It includes up to 80 activities to embed each learning experience into daily provision with dedicated plans to develop specific skills and aspects of mathematics. The activities throughout the book are low cost and easy to set up, aiming to reassure practitioners and give them the confidence to plan more mathematical learning experiences outdoors. This is further supported with planning guidance and resource ideas as well as advice on observation and assessment including suggestions for how to reduce the paperwork burden and a useful observation template. The book is divided into sections that represent the different aspects of mathematics and includes an introduction to each aspect explaining why it is important and outlining the fundamental skills and concepts that underpin it. Ideas for adult-led and adult-initiated activities that aim to develop children's early mathematical knowledge, skills and understanding, suggestions for how to enhance continuous outdoor provision so that it promotes independent investigation, fostering creative and critical thinking, pointers and tips about teaching mathematics in the early years, ideas for how to involve parents and carers, and links to all four British early years curriculum frameworks.

Context-Aware Systems and Applications, and Nature of Computation and Communication Phan Cong Vinh, Vangalur Alagar, 2018-12-29 This book constitutes the refereed post-conference proceedings of the International Conferences ICCASA and ICTCC 2018 held in November 2018 in Viet Tri City, Vietnam. The 20 revised full papers presented were carefully selected from 30 submissions. The papers of ICCASA cover a wide spectrum in the area of context-aware systems. CAS is characterized by its self-facets such as self-organization, self-configuration, self-healing, self-optimization, self-protection, used to dynamically control computing and networking functions. The papers of ICTCC cover formal methods for self-adaptive systems and discuss natural approaches and techniques for computation and communication.

Understanding Digital Technologies and Young Children Susanne Garvis, Narelle Lemon, 2015-09-08 *Understanding Digital Technologies and Young Children* explores the possibilities digital technology brings to enhance the learning and developmental needs of young children. Globally, the role of technology is an increasingly important part of everyday life. In many early childhood education frameworks and curricula around the world, there is an expectation that children are developing skills to become effective communicators and are using digital technology to investigate their ideas and represent their thinking. This means that educators throughout the world are expected to actively enhance children's learning in ways that provide learning experiences with technology that are balanced and purposeful to allow the transformation of traditional authentic learning experiences. Digital technologies can be used to explore, manipulate, discover, play and interact with real and imaginative worlds to allow active meaning-making. With a wide range of expert contributors, this book provides a comprehensive examination of the current research on technology and young children and the importance of engagement for learning. This

approach encourages the reader to rethink the possibilities and potential of digital technologies for learning in the early years especially in the years before formal schooling when children might be attending early childhood settings This will be a valuable reference for anyone looking for an international perspective on digital technology and young children and is particularly aimed at current and future teachers
