

## Using SD Cards

The Nintendo 3DS uses SD Cards up to 32GB in size and SDHC Cards of 4GB and larger.

The Nintendo 3DS system comes with an SD Card inserted into the SD Card slot. With SD Cards, you will be able to save photos you have taken with the system or play music saved to the SD Card. (The data that can be saved to an SD Card varies depending on the software.)

Software that you have downloaded, other than WiiWare (see page 6), is saved to the SD Card. **IMPORTANT:** Downloaded software that has been saved on several cards cannot be re-saved onto a single card.

### Using miniSD Cards or microSD Cards (sold separately)

These require an SD Card adapter (sold separately).

**IMPORTANT:** Inserting or removing a miniSD Card or microSD Card while the card adapter is still inserted in the system could cause the system to be damaged or malfunction, or cause loss of data. Always insert and remove the entire card adapter.

### Removing an SD Card

Make sure the power is off.

**IMPORTANT:** To prevent damage to the system or the SD Card, do not remove or insert the SD card while the system is on, unless instructed to do so by the software you are using. Doing so may destroy data.

Open the SD Card slot cover and press on the end of the card until it clicks and partially ejects from the slot. Grasp the SD Card and remove from the card slot.

### Inserting an SD Card

#### 1 Open the SD Card slot cover.

**IMPORTANT:** Do not pull or bend the slot cover forcefully. Doing so could stretch or deform it, which could prevent the cover from closing correctly.

#### 2 Insert the SD Card.

Insert the SD Card into the SD Card slot until it clicks into place, making sure the label side faces down. Close the SD Card slot cover.

### SD Card write-protection switch

In the down position, the SD Card write-protection switch will prevent you from saving or erasing data on the card. In the up position, you can save and erase data on the card.

### About SD-Card capacity

If you begin to run out of room on an SD Card, first try deleting undesired photos, sound files, or software using the Data Management feature in System Settings (see page 12). If you still need more room, you can purchase a higher capacity SD Card and move all of the files onto the new SD Card.

For a PC that has an SD Card slot or a commercially available SD Card reader/writer to transfer files.

**IMPORTANT:** Downloadable software and its save data are saved in the Nintendo 3DS folder. (Phone data is not included.) Please do not alter, move, or erase files or change the names of the files in the Nintendo 3DS folder.

### Copying files

Please make sure to copy each of the pertinent folders within the Nintendo 3DS folder.

If you copy software to a new SD Card, play it, and save your progress, the same software on the old SD Card may become unusable. You cannot use multiple copies of the software.

If you copy software to a new SD Card, use the new SD Card and do not use the original data.

#### Precautions about copying files

You cannot insert/download software whose folders have been saved to multiple SD Cards. If you copy data to a new card and then overwrite that data by re-copying it, that data will become unusable.

If you individually copy the files in the Nintendo 3DS folder, the Nintendo 3DS system will not recognize them. You must copy each folder in the Nintendo 3DS folder without altering the contents.
