

The background is a vibrant blue field filled with various mathematical symbols and numbers in different colors. Symbols include plus (+), minus (-), multiplication (x), division (/), percent (%), and hash (#). Numbers range from single digits (1, 2, 3, 4, 5, 6, 7, 8, 9) to two-digit numbers (11, 12, 17, 18, 19, 44, 50, 60, 70, 80, 90) and even a three-digit number (100). Some numbers are stylized or part of simple equations (e.g., 1+1=2, 3x3=9).

Shannon,2018-01-24 **The Educational Implications of DIBELS Oral Reading Fluency Assessments and Mississippi Curriculum Test 2 in Reading First Schools** Debra A. Dace,2010 The purpose of this study was to examine the predictive strength and decision making utility of oral reading fluency as it relates to reading comprehension The relationship of DIBELS ORF scores and the Language Arts LA Mississippi Curriculum Test 2 MCT2 scores was explored Specifically the research questions addressed were 1 Is there a significant relationship between third grade students Oral Reading Fluency score on DIBELS and Reading Achievement level on the third grade Mississippi Curriculum Test second edition MCT2 for language arts 2 Is there a significant relationship between third grade students obtained MCT2 proficiency levels of minimal basic proficient and advanced and DIBELS Oral Reading Fluency performance levels and 3 Is there a significant relationship between third grade students obtained MCT2 language arts scale score student achievement and other factors gender lunch status and attendance When DIBELS ORF scores and MCT2 Language Arts scores were compared using the Pearson Product Moment Correlation a positive correlation existed for the data collected from 261 third grade students in the Mississippi delta region 2007 2008 and 2008 2009 cohorts A Two Way Chi Square revealed that students who performed at the low risk benchmark for DIBELS ORF also performed in the proficient and above ranges on the MCT2 LA Finally an Independent Samples T Test demonstrated that other factors such as gender and attendance were not significant in predicting MCT2 LA performance However lunch status showed some significance with one cohort of third grade students Nevertheless the findings from this study are in alignment with other states such that a high correlation between the state assessment MCT2 and DIBELS ORF exists The researcher found evidence that the use of DIBELS ORF as a formative assessment tool along with other variables may provide useful data to educators to identify students at risk of reading failure on the third grade end of year MCT2 LA The information provided from this research supports the contention that DIBELS ORF data may be used to inform intervention decisions in order to prevent future reading failure *The Implementation of a Promotion/retention Policy to Effect Change in Student Achievement in Third Grade Reading/language Arts* Donna N. Shea,2015 For decades there has been an ongoing push to increase student achievement through large scale policy reform and yet far too many students in the United States still perform below proficiency levels with achievement gaps according to race and socio economic status Choctaw County School District CCSD was no different as low performance especially in reading language arts and achievement gaps according to race and SES were present To address these issues CCSD implemented a K 2 promotion retention policy in 2008 to improve student achievement The primary purpose of the study was to investigate how a school district s implementation of a K 2 policy for promotion and retention with specific strategies may have influenced academic achievement in the area of reading language arts A mixed method research design was used to conduct the study A narrative approach was used to provide a response to the first research question A 1 way analysis of variance ANOVA with a Sheffe post hoc test was used as the primary means of analysis for the second research question to

determine if there were statistically significant differences in the Grade Three Reading Language Arts MCT2 scores according to the length of time under the policy A 2 way ANOVA was used as the primary means of analysis for the 3rd 5th research questions to determine whether there were interaction effects between length of time under the policy and gender race and or SES Analysis of the results from the first research question revealed themes that emerged from studying the leadership change process of the development and implementation of the K 2 promotion retention policy The emergent themes were aligned to the steps of Kotter s Change Theory Statistically significant differences were found between Grade Three Reading Language Arts MCT2 scores between no time under the implementation of the policy and three years and between 1 year and 3 years under implementation of the policy Statistically significant differences were found for the main effect of time under policy gender race and SES However no statistically significant differences were found for interactions of length of time under the policy and gender race or SES
