Show It Mathematics students in grades 3-8 will learn through guided instruction how to express themselves mathematically, think conceptually and gain essential critical thinking skills. Strategy instruction is supported by the included student activities, sentence frames, rubrics, exemplar writing samples and graphic organizers. Beginning Reading Yola Center, 2020-07-31. Most children learn to read irrespective of the method of instruction. Yet up to a fifth of children struggle with reading in their first few years at school. Unfortunately, those who struggle in the early years will continue to struggle throughout their school career. Yola Center offers a systematic research-based guide to teaching reading in the first three years of school. Her aim is to ensure that teachers can work with at-risk or reluctant readers in the regular classroom as effectively as with children for whom reading seems to come naturally. Taking an analytic approach to reading, Beginning Reading shows how children can be moved through the key stages of early reading acquisition. Each chapter includes an overview of relevant research, practical classroom strategies and guidelines for lesson planning. Center adopts a balanced view of reading instruction, stressing the importance of phonological processes at the beginning of literacy instruction, as well as semantic and syntactic ones. This supports at-risk children in regular classrooms who are provided with the maximum opportunity to develop the accurate and fluent word recognition skills that are needed in order to extract meaning from print. At last, a book that combines an overview of recent research findings and their implications for the teaching of reading with sensible and practical suggestions for classroom teachers. Morag Stuart, Professor in the Psychology of Reading, University of London. This is an excellent book. It comprehensively reviews the research literature and shows how to apply it to the nuts and bolts of teaching reading in the first few years of school. It is a must-read for teachers. Professor Tom Nicholson, University of Auckland, New Zealand. This is the book that we have all been waiting for. It is the only book that I have seen that focuses on a theoretically sound approach to the teaching of reading with a focus on children who experience difficulties in the regular classroom. Ruth Fielding, Barnsley, Queensland, University of Technology. It is indeed rare when a reading scientist can explain the intricacies of reading development, reading difficulties and reading instruction with such clarity and comprehensiveness. Most importantly, Dr. Center provides a masterful synthesis of the most current converging scientific evidence available that defines what research-based reading instruction is all about. G. Reid Lyon, PhD, National Institutes of Health, USA.

Marvelous Minilessons for Teaching Nonfiction Writing K-3 Lori Jamison Rog, 2015-12-11. Today's young learners know more about their world than ever before. This remarkable book shows that even our youngest writers can consider audience and purpose as they use nonfiction writing to document their ideas and share those ideas with others. But if students are going to be able to use writing to learn, they must have opportunities for learning to write. That's what this book is for. A wealth of hands-on minilessons offer strategies for writing informational, persuasive and procedural text. Each lesson starts with a learning goal and follows an I do, we do, you do format. Teachers will find a wealth of ideas for guiding young students to write about what they know and care about.
