Murali Krishna, 2021-07-27 This volume comprises the select proceedings of the Indian Geotechnical Conference IGC 2020 The contents focus on recent developments in geotechnical engineering for sustainable tomorrow The volume covers the topics related advances in ground improvement of weak foundation soils for various civil engineering projects and design construction of reinforced soil structures with different fill materials using synthetic and natural reinforcements in different forms **Deep Reinforcement Learning** Aske Plat, 2022-06-10 Deep reinforcement learning has attracted considerable attention recently Impressive results have been achieved in such diverse fields as autonomous driving game playing molecular recombination and robotics In all these fields computer programs have taught themselves to understand problems that were previously considered to be very difficult In the game of Go the program AlphaGo has even learned to outmatch three of the world's leading players Deep reinforcement learning takes its inspiration from the fields of biology and psychology Biology has inspired the creation of artificial neural networks and deep learning while psychology studies how animals and humans learn and how subjects desired behavior can be reinforced with positive and negative stimuli When we see how reinforcement learning teaches a simulated robot to walk we are reminded of how children learn through playful exploration Techniques that are inspired by biology and psychology work amazingly well in computers animal behavior and the structure of the brain as new blueprints for science and engineering In fact computers truly seem to possess aspects of human behavior as such this field goes to the heart of the dream of artificial intelligence These research advances have not gone unnoticed by educators Many universities have begun offering courses on the subject of deep reinforcement learning The aim of this book is to provide an overview of the field at

the proper level of detail for a graduate course in artificial intelligence It covers the complete field from the basic algorithms of Deep Q learning to advanced topics such as multi agent reinforcement learning and meta learning Expedient Reinforcement of Concrete for Use in Southeast Asia Frank B.
