

## Performance Tires & Wheels • Mounting

Before beginning any of the mounting activities, review all of the caution, warning and danger instructions associated with mounting already listed in the early part of the manual concerning tire/rim size match, inspect for damage, etc.

**19.** Install or review condition of any pressure sensor devices. This will prevent having to remount the tire later.

**20.** Begin the tire mounting process by lubricating both tire beads and the rim if necessary (figure 38).

Figure 38 - Lubricate Tire Beads

**21.** For mounting the lower bead; position the tire at an angle to the rim and mount (figure 39).

Figure 39 - Mount the Lower Bead

**22.** Next position the rim for the best mounting by assuring the valve stem or sensor devices will not prevent the upper bead from using the wheel's full drop center. Typically valves or sensor devices are positioned at 90 degrees forward of the duckhead.

**23.** Next position the R.H. taper roller on the tire and press the sidewall down even with the wheel's drop center. Next position the L.H. drop center tool at the 3 o'clock position and force down on the tire sidewall allowing the step on the plastic duckhead to engage the rim (figure 40)

Figure 40 - Position R.H. and L.H. Helpers

**24.** Start the mounting process by jogging the rotation of the machine (figure 41). On very low profile tires, it may be necessary to utilize the lift tool to assist in maintaining the tire bead in the wheel's drop center (figure 42).
