

73RD EPSILON EAGLES

The 73rd Epsilon Eagles became famous throughout the Varnus System for their well-organized defense against a series of spaceship raids from the Kabal of the Dying Sun. The sinister Arctus Vahl-Korlands had begun spearheading vicious attacks against the population of two worlds in particular: Noma II and III. The local Astra Militarum regiments proved not able to keep pace with the Dark Eldar, and those who were not killed outright ended up being transformed into experiments for the Harrowmill Coven. Segmentum command ordered the 73rd Epsilon Eagles to maintain a vigilant presence in the system, so that they might react to the defense of the cities in which the Kabal of the Dying Sun had struck.

Through the 73rd Epsilon Eagles never killed Vahl-Korlands, their rapid response, expertly coordinated, saved thousands of Imperial citizens from being claimed as prisoners. When sightings of a Dark Eldar Raider came from the shore lands of Noma II, the 73rd Epsilon Eagles dropped en masse from their Valkyries, deploying via grav-chutes to surround and eliminate the raiding party. Their mag equipment enabled them to launch attacks on clutches of Kabalin Warren, approaching from angles and heights for which the swift Dark Eldar had not planned. These sudden, unexpected blows slowed down the Dark Eldar greatly, allowing wider Imperial forces to be mustered. Together the 73rd and Astra Militarum troops were able to drive the remaining warriors of the Kabal of the Dying Sun from the planets, and the Dark Eldar raids eventually ceased in the Varnus System altogether.

The regimental symbol borne by the 73rd Epsilon Eagles is a heavily stylized fist known simply as the *Gravclaw*. The reason for this symbol is known only to the regiment's Imperators, and has never been explained to any outsider. Whether it is a mark of honor, or one of shame, remains a mystery.
