Craft Obsession Jeff Rice, 2016-11-09 Denied access to traditional advertising platforms by lack of resources craft breweries have proliferated despite these challenges by embracing social media platforms and by creating an obsessed culture of fans In *Craft Obsession* Jeff Rice uses craft beer as a case study to demonstrate how social media platforms such as Facebook and Twitter function to shape stories about craft Rice weaves together theories of writing narrative new media and rhetoric with a personal story of his passion for craft beer He identifies six key elements of social media rhetoric anecdotes repetition aggregation delivery sharing and imagery and examines how each helps to transform small personal experiences with craft into a more widespread movement When shared via social media craft anecdotes such as the first time one had a beer interrupt and repeat one another building a sense of familiarity and identity among otherwise unconnected people Aggregation the practice of joining unlike items into one space builds on this network identity establishing a connection to particular brands or locations both real and virtual The public releases of craft beers are used to explore the concept of craft delivery which involves multiple actors across multiple spaces and results in multiple meanings Finally Rice highlights how personal sharing operates within the community of craft beer enthusiasts who share online images of acquiring trading for and consuming a wide variety of beers These shared stories and images while personal for each individual reflect the dependence of craft on systems of involvement Throughout Rice relates and reflects on his own experience as a craft beer enthusiast and his participation via social media in these systems Both an objective scholarly study and an engaging personal narrative about craft beer *Craft Obsession* provides valuable insights into digital writing storytelling and social media

Extreme Mean Paula Todd, 2014-05-21 From one of Canada's foremost investigative writers a groundbreaking expos on the motives and machinations behind cyberabuse tormenting trolling harassment cyberbullying stalking and sexual extortion and the toll it is taking on children youth and adults around the world It seems as if each week our news broadcasts newspaper headlines Twitter feeds and Facebook timelines are dominated by stories of cyberbullying and other digital abuse This isn't the playground teasing and name calling of generations before the Internet This new abuse's unique characteristics anonymity permanence and viral audience can relentlessly exacerbate the humiliation pain and danger of its victims Ugly rumours that once snaked through school hallways and around the office water cooler are now delivered at lightning speed to the world while sexual extortion and revenge porn sites target those who've shared intimate images or had them stolen by hackers Cyberstalkers who target adults destroy reputations and careers And the splendid connectivity of social media such as Facebook and Twitter also makes us vulnerable to interpersonal terrorism while apps that promise privacy and rapid deletion are ridden with loopholes With vivid reportage Paula Todd goes deep into the world of extreme mean uncovering the people who use the Internet to undermine lives rather than improve them Through exclusive personal stories of online abuse from around the world including the suicide of Amanda Todd and the untold costs of Rebecca Black's experience as the most

hated girl on the Internet as well as interviews with troll tormentors accidental abusers victimized kids and adults Extreme Mean explores the often surprising roots of online abuse challenges current academic thinking and offers new ways of understanding the nasty and the nefarious who erode humanity and threaten Internet freedom Provocative astute and compelling Extreme Mean is a shocking yet inspiring illustration of behaviour that affects all of us It s a call to arms for change and a search for ways to turn a moral panic into a moral possibility The Law and Practice of the International Criminal Court Carsten Stahn,2015 The International Criminal Court has significantly grown in importance and impact over the decade of its existence This book assesses its impact providing a comprehensive overview of its practice It shows how the Court has contributed to major developments in international criminal law and identifies the ways in which it is in need of reform *Extreme Cinema* Mattias Frey,2016-03-15 Received an Honorable Mention for the 2017 British Association of Film Television and Screen Studies BAFTSS Best Monograph Award From Shortbus to Shame and from Oldboy to Irreversible film festival premieres regularly make international headlines for their shockingly graphic depictions of sex and violence Film critics and scholars alike often regard these movies as the work of visionary auteurs hailing directors like Michael Haneke and Lars von Trier as heirs to a tradition of transgressive art In this provocative new book Mattias Frey offers a very different perspective on these films exposing how they are also calculated products designed to achieve global notoriety in a competitive marketplace Paying close attention to the discourses employed by film critics distributors and filmmakers themselves Extreme Cinema examines the various tightropes that must be walked when selling transgressive art films to discerning audiences distinguishing them from generic horror pornography and Hollywood product while simultaneously hyping their salacious content Deftly tracing the links between the local and the global Frey also shows how the directors and distributors of extreme art house fare from both Europe and East Asia have significant incentives to exaggerate the exotic elements that would differentiate them from Anglo American product Extreme Cinema also includes original interviews with the programmers of several leading international film festivals and with niche distributors and exhibitors giving readers a revealing look at how these institutions enjoy a symbiotic relationship with the taboo breakers of art house cinema Frey also demonstrates how these apparently transgressive films actually operate within a strict set of codes and conventions carefully calibrated to perpetuate a media industry that fuels itself on provocation *State-Society Relations and Governance in China* Sujian Guo,2014-07-09 State society relations and governance are closely related areas of study and have become important topics in the social sciences in the past decades not only in developed countries but also in the developing world In China state society relations have been changing in the new era of reform and opening and governance has become a central concern in policy practice and in academia In this wide ranging collection of essays written by scholars from both inside and outside China the contributors explore the complexity of the changing state society relationship and the modes and practices of governance in China by combining theoretical exploration and empirical case

studies *The Patient Will See You Now* Eric Topol, 2016-10-25 The essential guide by one of America's leading doctors to how digital technology enables all of us to take charge of our health A trip to the doctor is almost a guarantee of misery You'll make an appointment months in advance You'll probably wait for several hours until you hear the doctor will see you now but only for fifteen minutes Then you'll wait even longer for lab tests the results of which you'll likely never see unless they indicate further and more invasive tests most of which will probably prove unnecessary much like physicals themselves And your bill will be astronomical In *The Patient Will See You Now* Eric Topol one of the nation's top physicians shows why medicine does not have to be that way Instead you could use your smartphone to get rapid test results from one drop of blood monitor your vital signs both day and night and use an artificially intelligent algorithm to receive a diagnosis without having to see a doctor all at a small fraction of the cost imposed by our modern healthcare system The change is powered by what Topol calls medicine's Gutenberg moment Much as the printing press took learning out of the hands of a priestly class the mobile internet is doing the same for medicine giving us unprecedented control over our healthcare With smartphones in hand we are no longer beholden to an impersonal and paternalistic system in which doctor knows best Medicine has been digitized Topol argues now it will be democratized Computers will replace physicians for many diagnostic tasks citizen science will give rise to citizen medicine and enormous data sets will give us new means to attack conditions that have long been incurable Massive open online medicine where diagnostics are done by Facebook like comparisons of medical profiles will enable real time real world research on massive populations There's no doubt the path forward will be complicated the medical establishment will resist these changes and digitized medicine inevitably raises serious issues surrounding privacy Nevertheless the result better cheaper and more human health care will be worth it Provocative and engrossing *The Patient Will See You Now* is essential reading for anyone who thinks they deserve better health care That is for all of us *Extreme Killing* James Alan Fox, Jack Levin, 2014-04-15 Filled with contemporary and classic case studies this fascinating overview of both serial and mass murder illustrates the many violent expressions of power revenge terror greed and loyalty Throughout the book renowned experts James Alan Fox and Jack Levin examine the theories of criminal behavior and apply them to a multitude of mass and serial murderers from around the world such as Adam Lanza Newtown CT James Holmes Aurora CO cinema Anders Breivik Oslo Norway Charles Manson Helter Skelter and Dennis Rader BTK This fully updated Third Edition of *Extreme Killing* helps readers understand the commonalities and variations among multiple murders addresses the characteristics of both killers and their victims and in the concluding chapter discusses the special concerns of multiple murder victims and their survivors **Wartime Origins and the Future United Nations** Dan Plesch, Thomas G. Weiss, 2015-01-09 The creation of the UN system during World War II is a largely unknown or forgotten story among contemporary decision makers international relations specialists and policy analysts This book aims to recover the wartime history of the United Nations and explore how the forgotten past can shed light on a possible and more desirable future To

achieve this each chapter takes three snapshots Then the imaginative and transnational thinking about solutions to post war problems demonstrated a realization that victory in WW II required an intergovernmental system with enough power and competence to work that is the UN was not established as a liberal plaything and public relations ploy but rather as a vital necessity for post war order and prosperity Now which often seems a pale imitation of wartime thinking that nonetheless reflects a growing and widespread recognition of the fundamental disconnect between the nature of trans boundary problems and current solutions seen as feasible by 193 UN member states Next steps or the collective wisdom about the range of new thinking and new institutions that in fact may well have antecedents in wartime thinking and experimentation and could be labelled blue prints for a third generation of intergovernmental organizations This work will be essential reading for all students and scholars of the United Nations International Organizations and Global Governance Ending Extreme Inequality Scott Myers-Lipton,2015-11-17 Poverty and inequality are at record levels Today forty seven million Americans live in poverty while the median is in decline The top 20 percent now controls 89 percent of all wealth These conditions have renewed demands for a new economic Bill of Rights an idea proposed by F D Roosevelt Truman and Martin Luther King Jr The new Economic Bill of Rights has a coherent plan and proclaims that all Americans have the right to a job a living wage a decent home adequate medical care good education and adequate protection from economic fears of unemployment sickness and old age Integrating the latest economic and social data Ending Extreme Inequality explores each of these rights Each chapter includes an analysis of the social problems surrounding each right a historical overview of the attempts to right these wrongs and assessments of current solutions offered by citizens community groups and politicians These contemporary real life solutions to inequality can inspire students and citizens to become involved and open pathways toward a more just society Organizational Change Tupper F. Cawsey,Gene Deszca,Cynthia Ingols,2015-04-17 Awaken mobilize accelerate and institutionalize change With a rapidly changing environment aggressive competition and ever increasing customer demands organizations must understand how to effectively adapt to challenges and find opportunities to successfully implement change Bridging current theory with practical applications Organizational Change An Action Oriented Toolkit Third Edition combines conceptual models with concrete examples and useful exercises to dramatically improve the knowledge skills and abilities of students in creating effective change Students will learn to identify needs communicate a powerful vision and engage others in the process This unique toolkit by Tupper Cawsey Gene Deszca and Cynthia Ingols will provide readers with practical insights and tools to implement measure and monitor sustainable change initiatives to guide organizations to desired outcomes **Extreme Weather and Global Media** Julia Leyda,Diane Negra,2015-06-05 In the two decades bracketing the turn of the millennium large scale weather disasters have been inevitably constructed as media events As such they challenge the meaning of concepts such as identity and citizenship for both locally affected populations and widespread spectator communities This timely collection pinpoints the features of an

often overlooked yet rapidly expanding category of global media and analyzes both its forms and functions Specifically contributors argue that the intense promotion and consumption of extreme weather events takes up the slack for the public conversations society is not having about the environment and the feeling of powerlessness that accompanies the realization that anthropogenic climate change has now reached a point of no return Incorporating a range of case studies of extreme weather mediation in India the UK Germany Sweden the US and Japan and exploring recent and ongoing disasters such as Superstorm Sandy the Fukushima nuclear crisis flooding in Germany and heat waves in the UK Extreme Weather and Global Media generates valuable inquiry into the representational and social characteristics of the new culture of extreme weather

Foundations of Circulation Control Based Small-Scale Unmanned Aircraft Konstantinos Kanistras,Kimon P. Valavanis,Matthew J. Rutherford,2017-11-02 This book focuses on using and implementing Circulation Control CC an active flow control method used to produce increased lift over the traditionally used systems like flaps slats etc to design a new type of fixed wing unmanned aircraft that are endowed with improved aerodynamic efficiency enhanced endurance increased useful payload fuel capacity battery cells on board sensors during cruise flight delayed stall and reduced runway during takeoff and landing It presents the foundations of a step by step comprehensive methodology from design to implementation and experimental testing of Coand based Circulation Control Wings CCWs and CC system both integral components of the new type of aircraft called Unmanned Circulation Control Air Vehicle The methodology is composed of seven coupled phases theoretical and mathematical analysis design simulation 3 D printing prototyping wind tunnel testing wing implementation and integration and flight testing The theoretical analysis focuses on understanding the physics of the flow and on defining the design parameters of the geometry restrictions of the wing and the plenum The design phase centers on designs of Coand surfaces based on wing geometry specifications designing and modifying airfoils from well known ones NACA series Clark Y etc plenum designs for flow uniformity dual radius flap designs to delay flow separation and reduce cruise drag The simulation phase focuses on Computational Fluid Dynamics CFD analysis and simulations and on calculating lift and drag coefficients of the designed CCWs in a simulation environment 3 D printing and prototyping focuses on the actual construction of the CCWs Wind tunnel testing centers on experimental studies in a laboratory environment One step before flight testing is implementation of the qualified CCW and integration on the UAV platform along with the CC system Flight testing is the final phase where design validation is performed This book is the first of its kind and it is suitable for students and researchers interested in the design and

development of CCWs for small scale aircraft Background knowledge on fundamental Aerodynamics is required **The Great Retreat** Didi Kuo, 2025 The Great Retreat How Political Parties Should Behave And Why They Don't examines political parties as an institution central to democracy and critical to the relationship between democracy and capitalism Political parties are the foremost intermediaries entrusted with representing the interests of a diffuse citizenry Thus parties shaped democracy and were crucial to democratic stability and success When working well political parties socialize citizens into politics and provide a consistent mechanism for citizens to wield a voice in their governments The Great Retreat also considers the party development in Europe and Latin America in correlation with the trends in the United States

Rethinking Geographical Explorations in Extreme Environments Marco Armiero, Roberta Biasillo, Stefano Morosini, 2022-07-14 Focusing on extreme environments from Umberto Nobile's expedition to the Arctic to the commercialization of Mt Everest this volume examines global environmental margins how they are conceived and how perceptions have changed Mountaintops and Arctic environments are the settings of social encounters political strategies individual enterprises geopolitical tensions decolonial practises and scientific experiments Concentrating on mountaineering and Arctic exploration between 1880 1960 contributors to this volume show how environmental marginalisation has been discursively implemented and materially generated by foreign and local actors It examines to what extent the status and identity of extreme environments has changed during modern times moving them from periphery to the centre and discarding their marginality The first section looks at ways in which societies have framed remoteness through the lens of commercialization colonialism knowledge production and sport while the second examines the reverse transfer focusing on how extreme nature has influenced societies through international network creation political consensus and identity building This collection enriches the historical understanding of exploration by adopting a critical approach and offering multidimensional and multi gaze reconstructions This book is essential reading for students and scholars interested in environmental history geography colonial studies and the environmental humanities Management with Online Study Tools
