Determine Cause of A Shutdown

CAUTION

If the engine has been shut down by a safety device, do not start the engine without having the cause of the shutdown corrected.

Woodward Governors

Woodward Governors are usually electrically operated from a control panel. The load application is usually a generator set operation. On standby sets the governor may be set to operate only at full load speed.

The engine may be stopped manually by moving the hand lever upward or forward, depending upon the installation.

Hold the lever in the stop position until the engine stops.

④ Water Separator—Drain

CAUTION

The engine should never be allowed to run with the water level in the element more than 1/2 full or engine damage may result.

1. Close the fuel supply valve, if equipped.
2. Open the separator drain valve (1).
3. Open the separator vent valve (2).
4. After water is drained, close the vent valve and drain valve, and then open the fuel supply one valve.

Replace Element

Change element anytime water separator becomes contaminated enough that water level cannot be seen through the transparent cover.

1. Shut off the engine and close the fuel supply valve, if equipped.
2. Clean all dirt from the separator and surrounding area.

3. To remove the element, depress the extended tab with the heel of the hand. Then lift the sealed tab from the locking slot, at the top of the base, with the fingers.
4. Put the old element from the base and discard it.
