Place Matters Peter Dreier, John H. Mollenkopf, Todd Swanstrom, 2001 The central thesis of *Place Matters* is that economic segregation between rich and poor and the growing sprawl of American cities and suburbs are not solely the result of individual choices in free markets Rather these problems have been powerfully shaped by short sighted government policies *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1971 First multi year cumulation covers six years 1965 70 *Integrating Seaports and Trade Corridors* Robert J. McCalla, Brian Slack, 2016-05-23 Seaport gateways and the corridors which connect them to widely dispersed hinterlands are of vital and essential importance to international trade and the world economy Distributing goods to ultimate land destinations or bringing the goods to seaports from inland origins is organizationally complex involving multiple actors This book furthers understanding about

how this movement is organized the role of ports acting as gateways and the actions of corridor players A key question that confronts the shipping and port industries as well as public authorities is how to increase the benefits of maritime trade to the companies and institutions directly involved as well as the port city regions where the transfers take place This question is being posed in the midst of a global economic recession and trade downturn and in the context of contemporary policy frameworks whose goals are to generate economic benefits and efficiencies rather than to maximize traffic volumes This book puts into perspective the reality opportunities and challenges facing seaport gateways and corridors now and in the future *Rethinking Warfare in the 21st Century* Iulian Chifu,Greg Simons,2023-07-13 A critical and multifaceted analysis

Baev,2012-12-06 This book examines the interplay between energy policy and security policy under Vladimir Putin and his drive to re establish Russia s greatness Assessing the internal contradictions of this policy the book argues that Russia s desire to strengthen its role of energy security provider is undermined by its inability to secure growth in production of oil and gas Further the pressing demand to channel more resources into the military industrial complex clashes with the growing need to invest in the energy complex and the priority granted to strategic forces deprives the conventional forces of strike power and strategic mobility In conclusion the author anticipates how these contradictions could be resolved and suggests three short scenarios for Russia s continuing transition in the next decade This book will be of interest to students of Russian politics European politics and international security *Burke and Wills*
