Curriculum Handbook with General Information Concerning ... for the United States Air Force Academy United States Air Force Academy, 2004      Teaching Science in the Two-year College Timothy M. Cooney, 2003 Two year colleges are critical to science education OCOs future OCO in fact some data indicate that half of future science teachers will take their first years of science at a two year school To address the unique challenges of this special setting presents 24 articles featuring the most useful and relevant insights and advice from NSTA OCOs Journal of College Science Teaching      *Undergraduate Mathematics for the Life Sciences* Glenn Ledder, Jenna P. Carpenter, Timothy D. Comar, 2013 There is a gap between the extensive mathematics background that is beneficial to biologists and the minimal mathematics background biology students acquire in their courses The result is an undergraduate education in biology with very little quantitative content New mathematics courses must be devised with the needs of biology students in mind In this volume authors from a variety of institutions address some of the problems involved in reforming mathematics curricula for biology students The problems are sorted into three themes Models Processes and Directions It is difficult for mathematicians to generate curriculum ideas for the training of biologists so a number of the curriculum models that have been introduced at various institutions comprise the Models section Processes deals with taking that great course and making sure it is institutionalized in both the biology department as a requirement and in the mathematics department as a course that will live on even if the creator of the course is no longer on the faculty Directions looks to the future with each paper laying out a case for pedagogical developments that the authors would like to see      Centering Humanism in STEM Education Bryan Dewsbury, Susannah McGowan, Sheila S. Jaswal, Desiree Forsythe, 2024-09-24 Research demonstrates that STEM disciplines perpetuate a history of exclusion particularly for students with marginalized identities This poses problems particularly when science permeates every aspect of contemporary American life Institutions repeated failures to disrupt systemic oppression in STEM has led to a mostly white cisgender and male scientific workforce replete with implicit and or explicit biases Education holds one pathway to disrupt systemic linkages of STEM oppression from society to the classroom Maintaining views on science as inherently objective isolates it from the world in which it is performed STEM education must move beyond the transactional approaches to transformative environments manifesting respect for students social and educational capital We must create a STEM environment in which students with marginalized identities feel respected listened to and valued We must assist students in understanding how their positionality privilege and power both historically and currently impacts their meaning making and understanding of STEM      **Bioinformatics: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources, 2013-03-31 Bioinformatics Concepts Methodologies Tools and Applications highlights the area of bioinformatics and its impact over the medical community with its innovations that change how we recognize and care for illnesses Provided by publisher      **Graduate Programs in the Biological/Biomed Sciences &**

Lipstick and Autism Lauren Ratcliff, 2023-09-10 Autism is the fastest growing and most common developmental disorder Imagine the frustration and anxiety over taking your child to a team of medical specialists to be told that they have a lifelong and often debilitating developmental disorder with no cure and limited treatment options Lauren s parents knew something was different about her from the time she was an infant but as she entered Kindergarten in the fall of 1986 her differences were very obvious to everyone around her as compared to other children her age A few months later in early 1987 Lauren s parents took her to see a team of pediatric specialists and it was then confirmed that she had an incurable and lifelong disorder then known as Pervasive Developmental Disorder and was later diagnosed with Asperger Syndrome when it was listed in diagnostic criteria Today that would be known as autism spectrum disorder classified as level one to three based on the type and severity of the disorder Like so many other parents with special needs children Lauren s parents faced many trials and tribulations with treatment options including health costs limited yet very expensive treatment options that did not always work and dealing with people who oftentimes misunderstood Lauren When Lauren was a young child growing up in the 1980s and 90 s in a rural area in eastern Kentucky little was known about the Autism Spectrum in general let alone the high functioning type of the disorder that Lauren has Because of this Lauren often felt stigmatized for her condition in addition to feeling isolated and alone Like many others with Autism Spectrum Disorders Lauren has faced her share of challenging symptoms and in this

book she shares her personal experience with High Functioning Autism and how it has impacted her life In this memoir book written by Lauren firsthand about her entire life she explains what it was like to live with autism spectrum disorder from a personal perspective and hopes to also educate others about the condition and erase the stigma associated with the disorder
