### Section: What Causes Air Pollution?

Read the passage below and answer the questions that follow.

Many industries and power plants that generate our electricity must burn fuel to get the energy they need. They usually burn fossil fuels. Burning fossil fuels releases huge quantities of sulfur dioxide and nitrogen oxide into the air. Power plants that produce electricity emit at least two-thirds of all sulfur dioxide and more than one-third of all nitrogen oxides that pollute the air.

Some industries also produce VOCs, which are chemical compounds that form toxic fumes. Some of the chemicals used in dry cleaning are sources of VOCs. Oil refineries, chemical manufacturing plants, furniture refinishers, and automobile repair shops also contribute to the VOCs in the air. When people use some of the products that contain VOCs, more VOCs are added to the air.

**Educating, Education, Educators: Working to Create an Educated Nation** Ashwannie Harripersaud, 2025-06-16 *Educating Education* Educators Working to Build an Educated Nation critically examines Guyana's education system through the metaphor of John Donne's stiff twin compasses symbolizing interconnected yet often overlooked concentric circles: students, teachers, parents, policymakers, and society. Challenging the narrow focus on exam results as the sole measure of success, the book explores systemic gaps from gender disparities in teaching to linguistic tensions in classrooms, psychological barriers in math education, and the impact of single parenthood on learning. It advocates for holistic success, valuing civic mindedness and creativity alongside academic achievement. By analyzing these hidden variables, the book calls for reforms to foster an equitable, innovative, and truly educated nation. It urges educators and policymakers to redefine success beyond grades, prioritizing collective growth and national development.
