Robotics Research Antonio Bicchi, Wolfram Burgard, 2017-07-25 ISRR the International Symposium on Robotics Research is one of robotics pioneering Symposia which has established over the past two decades some of the field's most fundamental and lasting contributions. This book presents the results of the seventeenth edition of Robotics Research ISRR15 offering a collection of a broad range of topics in robotics. The content of the contributions provides a wide coverage of the current state of robotics research, the advances and challenges in its theoretical foundation and technology basis and the developments in its traditional and new emerging areas of applications. The diversity, novelty and span of the work unfolding in these areas reveal the field's increased maturity and expanded scope and define the state of the art of robotics and its future direction.

Occupational Therapy in East Asia Hector Wing Hong Tsang, Stella Wai Chee Cheng, David Wai Kwong Man, 2025-10-21 This is the first major textbook on occupational therapy OT aimed at students and practitioners based in Asia. Written by a team of authors mainly based in Hong Kong, the book is divided into four sections. Section I presents the history of OT in the region as well as those key theories which underpin it. Section II introduces the essentials of OT practice. From assessment through to evaluation and intervention, these chapters cover five key therapeutic areas in which occupational therapists work: providing support for sensory and motor functions; providing support for cognitive and perceptual issues; providing support for psychosocial issues; providing support for returning to home and the community including the use of assistive technology; and providing support for returning to the workplace. Section III then details a range of case studies to show occupational therapists in action while Section IV looks at how the field is developing including the increasing use of AI and other technologies. Throughout the book, cultural factors specific to the region are highlighted. An ideal resource for any student in Hong Kong, mainland China, Taiwan or Singapore, this outstanding text is also a key reference work for practitioners in the region.

Mind-Brain Plasticity and Rehabilitation of Cognitive Functions: What Techniques Have Been Proven Effective? Katuscia Sacco, Benedetto Sacchetti, 2017-05-25

Hand Preference and Hand Ability Miriam Ittyerah, 2013-09-18 This volume adds new dimension and organization to the literature of touch and the hand, covering a diversity of topics surrounding the perception and cognition of touch in relation to the hand. No animal species compare to

humans with regard to the haptic or touch sense so unlike visual or auditory cognition we know little about such haptic cognition We do know that motor skills play a major role in haptics but senses like vision do not determine hand preference or hand ability It seems also that the potential ability to perform a task may be present in both hands and evidence indicates that the hand used to perform tactile tasks in blind or in sighted conditions is independent of one's hand preference This book will be useful for those in education and robotics and can serve as a general text focusing on touch and developmental psychology *Interventions, Effects, and Outcomes in Occupational Therapy* Mary C. Law, Mary Ann McColl, 2010

Occupational therapists are expected to maintain their knowledge of best practice by independently keeping up to date on the latest research With this work the authors have assembled the evidence for effectiveness of occupational therapy for adults and older adults It brings together the latest published peer reviewed literature conceptual approaches outcome measures and intervention approaches to address the three main areas by Identifying a finite set of interventions which occupational therapists deliver most often and providing details of those intervention approaches Identifying where the research evidence shows that occupational therapists can achieve specific positive effects as a result of those interventions Identifying the outcome measures most commonly and reliably used by researchers in occupational therapy to demonstrate the effects of interventions The authors have comprehensively reviewed all of the intervention effectiveness literature for occupational therapy provided for adults The material reviewed crosses all diagnostic categories and areas of practice for adults and older adults Analysis of over 500 research studies and systematic reviews form the basis for this book
