Intergenerational Justice Lukas H. Meyer, 2017-05-15 The essays selected for this volume show how relations between past current and future generations have become a major subject of philosophical research since the 1970s The relations between people alive today with people who may exist in the future and people now deceased differ from relations between contemporaries and in ways that raise new conceptual logical and substantive questions Among the

questions addressed in this volume are what is the status of people now deceased and people who may exist in the future Can the latter be harmed by the actions of people alive today What duties of justice do we have towards people with whom we can neither interact nor co operate and can people who are indirect victims of past injustices legitimately claim compensation Answers to these questions are relevant in a number of policy areas most notably in issues regarding reparations for historical injustice and responding to climate change and its consequences

Democracy, Equality, and Justice Matt Matravers,Lukas Meyer,2015-04-08 In addressing democracy equality and justice together the book stimulates discussions that go beyond the sometimes increasingly technical and increasingly discrete literatures that now dominate the study of each concept The chapters fall into four categories on justice and democracy justice and equality justice and community and justice and the future Concerns of justice unite all the chapters in this volume However these concerns now manifest themselves in interesting and new directions Politically the book confronts urgent problems of democracy equality community and of how to respond to potentially catastrophic climate change The response to these problems cannot only be pragmatic and piecemeal What emerges are a number of interlinking questions and themes that together constitute the central core of contemporary political philosophy This book was previously published as a special issue of the Critical Review of Social and Political Philosophy
