The Burning Answer Keith Barnham, 2015-05-15 Our society faces a choice We could be enjoying a sustainable lifestyle but we have chosen not to In three generations we have consumed half the oil produced by photosynthesis over eight million generations In two generations we have used half our uranium resources With threats from global warming oil depletion and nuclear disaster we are running out of options Solar power as Keith Barnham says is our necessary solution Barnham explains that the roots of solar energy lie in a little known equation $E = hf$ an equation which was coincidentally celebrated and explained to the world by Einstein in the same year he discovered $E = mc^2$ He alleges that the former equation has been overlooked in favor of the latter much to our detriment and Barnham is here to offer us a solution We can still turn things around and solar energy is the key In this provocative inspiring passionately argued book Keith Barnham outlines actions that any one and all of us can take to make an impact now and on future generations The Burning Answer is a solar manifesto for the new climate aware generation and a must read for climate change skeptics The Cumulative Book Index, 1965 A world list of books in the English language The British National Bibliography Arthur James Wells, 1979 *Catalog of Copyright Entries. Ethnographies of Reason Eric Livingston, 2017-05-15 Written by one of the most eminent scholars in the field Ethnographies of Reason is a unique book in terms of the studies it presents the perspective it develops and the research techniques it illustrates Using concrete case study materials throughout Eric Livingston offers a fundamentally different ethnographic approach to the study of skill and reasoning At the same time he addresses a much neglected topic in the literature illustrating practical techniques of ethnomethodological research and showing how such studies are actually conducted The book is a major contribution to ethnomethodology to social science methodology and to the study of skill and reasoning more generally

Fundamentals of Polymer Physics and Molecular Biophysics Himadri B. Bohidar, 2015-01-05 Macromolecules in solutions can be distinctly characterised by their transport behaviour in solution phase The study of the transport processes includes diffusion coefficient sedimentation coefficient intrinsic viscosity and friction constant The question arises as to how to explicitly characterise the macromolecules from the data of coefficients This book answers this question in a systematic manner It provides physical interpretation of the data obtained in macromolecular transport phenomena in a given system and also addresses some important issues and concepts related to biopolymers such as proteins and nucleic acids The application of concepts like conformational properties and salient physicochemical features of protein and nucleic acids is also elucidated in the book Based on the molecular structure it provides the essential concepts which can be used to model and analyse the static and transport behaviour of polymers and biopolymers

Electrochemistry H R Thirsk, 2007-10-31 Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research Written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry For over 80 years the Royal Society of Chemistry and its predecessor the Chemical Society have been publishing reports charting developments in chemistry which originally took the form of Annual Reports However by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic Organic and Physical Chemistry For more general coverage of the highlights in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued
