For each disorder they provide learners with an understanding of the best supported biological and psychological treatments so that learners come away with the latest science on what works and for whom. Critical issues in how race culture and country of origin are considered. The final chapter of the book covers important legal and ethical issues in the mental health field. The importance of stigma and mental illness is discussed throughout the book. Never is this more important than now when many social ills are too easily blamed on mental illness e.g. gun violence while we continue to warehouse people with mental illness in jails at an astonishing rate.
