AMAST movement have occurred. This can be taken as proof that the AMAST vision is right. However, often the myriad of workshops, conferences and research programs lack the clear objectives and the coordination of their goals towards the software technology envisioned by AMAST. This can be taken as a proof that AMAST is still necessary.

Digital Communities in a Networked Society Manuel J. Mendes, Reima Suomi, Carlos Passos, 2006-04-11. Digital Communities in a Networked Society: e-Commerce, e-Business and e-Government deals with the accelerating evolution in the computerization of society. This evolution or should we call it a revolution is dominantly driven by the Internet and documented by the novelties introduced year by year by Information and Communication Technologies. The book contains recent results of research and development in the areas of E-government, Business models of e-applications, Innovative structures in the internet, Auctions and e-payment, Future aspects of communication, Internet and the web, Advanced platforms and grid computing, Cooperation and integration, Modeling and construction of e-services.

Software Engineering Research, Management and Applications Roger Lee, 2013-07-19. The purpose of the 11th International Conference on Software Engineering Research, Management and Applications (SERA 2013) held on August 7-9, 2012 in Prague, Czech Republic was to bring together scientists, engineers, computer users and students to share their experiences and exchange new ideas and research results about all aspects: theory, applications and tools of Software Engineering Research, Management and Applications and to discuss the practical challenges encountered along the way and the solutions adopted to solve them. The conference organizers selected 17 outstanding papers from those papers accepted for presentation at the conference in order to publish them in this volume. The papers were chosen based on review scores submitted by members of the program committee and further rigorous rounds of review.

Distributed Computing and Internet Technology Goutam Chakraborty, 2005-12-09. The opening ceremony and pre-conference tutorials on various related topics were held on December 21. The technical program started on December 22 and continued for three days. The program was arranged in single track so as to enable participants to attend sessions of different tracks. Papers from the DM, IT, SE and SS tracks were divided into two sessions, whereas DC track sessions were held on the first two days of the conference. The program also included two plenary talks. The first talk was delivered by S. S. Iyengar from Louisiana State University, USA. The second talk was delivered by He Jifeng from the International Institute for Software Technology, IIST, Macau. Prof. Iyengar's talk on The Distributed Sensor Networks: An Emerging Technology was focused on new ideas about the use of distributed systems for emerging technology, while Prof. Jifeng's talk on Linking Theories of Concurrency by Retraction dealt with semantics of concurrency. All the conference committee members contributed towards the success of ICDCIT 2005. And it was a pleasant experience for me to work with them. The one name that sticks out is R. K. Ghosh, Steering Committee Chair. He really steered the group with his past experience as Program Chair of ICDCIT 2004.
