Heuretics Gregory L. Ulmer, 1994 **Writing Short Stories** Ailsa Cox, 2025-03-04 The third edition of *Writing Short Stories* has been revised and updated to provide a complete guide to the craft of writing short stories. It emphasizes the importance of voice as a foundation for work on characterization, imagery, dialogue, and pace as readers move from their first sketches to working on more complex narrative structures. Ailsa Cox guides readers through key aspects of the craft, providing a variety of case studies of classic and contemporary core texts. The wide range of writers discussed includes Edgar Allan Poe, Katherine Mansfield, Angela Carter, Alice Munro, Ali Smith, Iphigenia Baal, Octavia E. Butler, and William Gibson. The diversity and flexibility of the short story genre is highlighted throughout, along with the specific challenges the writer faces. The book considers a range of genres such as fantasy, science fiction, horror, autobiography, romance, comedy, and satire. The new edition also includes extra insights into getting published, including publishing a first collection with an updated list of resources and trends in short story writing. This inspiring guide is the ideal companion for those new to the genre or for anyone looking to improve their technique. Each chapter contains a series of engaging exercises to help readers develop their skills and build confidence in their writing. There are also bolded key terms with an extensive glossary at the end of the book.

English Journal, 1995 *Exhaustion* Anna K. Schaffner, 2016-06-21 Today our fatigue feels chronic, our anxieties amplified. Proliferating technologies command our attention. Many people complain of burnout and economic instability, and the threat of ecological catastrophe fills us with dread. We look to the past, imagining life to have once been simpler and slower, but extreme mental and physical stress is not a modern syndrome. Beginning in classical antiquity, this book demonstrates how exhaustion has always been with us and helps us evaluate more critically the narratives we tell ourselves about the phenomenon. Medical, cultural, literary, and biographical sources have cast exhaustion as a biochemical imbalance, a somatic ailment, a viral disease, and a spiritual failing. It has been linked to loss, the alignment of the planets, a perverse desire for death, and social and economic disruption. Pathologized, demonized, sexualized, and even weaponized, exhaustion unites the mind with the body and society in such a way that we attach larger questions of agency, willpower, and well-being to its symptoms. Mapping these political, ideological, and creative currents across centuries of human development, *Exhaustion* finds in our struggle to overcome weariness a more significant effort to master ourselves. *Silicon Seduction* M.K.
