Escaping the Progress Trap Daniel Brian O'Leary, 2005-12-31 The Progress Trap As the name implies it is the condition in which we find ourselves when science technology and industry create more problems than they can solve Often inadvertently Many experts have warned about the resulting ecological crisis The prophets of doom have spoken and alarm bells have sounded Some critics are even optimistic but they have no plan They have not provided a detailed analysis of why humans fall into progress traps They have not put forward what is necessary for emerging from them Until now Find out why societies have a tendency to become entangled in their own ingenuity Then learn how well equipped we humans are for resolving the environmental quandary and other traps Finding our way out of this predicament is a vital idea when we learn how to nurture and use our talent for creative problem solving Resources in Education, 1985 **Publishers Weekly**
